P-R-O-C-E-E-D-I-N-G-S

(9:01 a.m.)

COURT REPORTER: We are now on the record. Here begins the deposition of Dr. Andrew Wolfe, taken in the matter of Cutting Edge Vision LLC vs. T-Mobile US, Inc. and T-Mobile USA, Inc., Case No. 6:24-CV-270-AM-DTG. We are convened remotely via Zoom. My name is Eric Mollen. I'm the court reporter from Neal R. Gross and Company. Today's date is Friday, March 14th, 2025, and the time is 9:02 a.m. Pacific. Would all present please introduce yourselves and whom you represent for the record?

MR. LESKO: Good morning. My name is Justin Lesko, and I'm here on behalf of the Plaintiff, Cutting Edge Vision, LLC.

MS. LISA: Hello, I'm Michelle Lisa, and I'm also here on behalf of Plaintiff Cutting Edge Vision, LLC.

MS. WEISKOPF: I'm Elizabeth Weiskopf from K&L Gates, on behalf of the witness and the T-Mobile Defendants.

MR. LESKO: Okay, great. So, Dr. Wolfe, I'm going to start with a few ground rules for today's deposition.

1 COURT REPORTER: Actually, Mr. Lesko --
2 DR. WOLFE: Do you want to swear me in?
3 COURT REPORTER: Yes, I should swear him
4 in.

5 MR. LESKO: Sorry.

6 COURT REPORTER: Dr. Wolfe, would you
7 raise your right hand, please?
8 WHEREUPON,

9 ANDREW WOLFE
10 was called as a witness by Counsel for the
11 Plaintiff and, after having been first duly
12 sworn, was examined and testified as follows:

13 DIRECT EXAMINATION

14 MR. LESKO: Okay. Dr. Wolfe, I'm going
15 to start with a few ground rules. I'm sure
16 you've heard these before but we still want to go
17 through them. So first, for today's deposition,
18 you should only have the Zoom meeting, the
19 documents folder -- actually, let me ask you
20 first. Do you have access to the folder of
21 documents that I sent to Ms. Weiskopf?

22 THE WITNESS: No.

23 MR. LESKO: Okay. Can we go off the
24 record here?

25 COURT REPORTER: Yes, we're off the

1 record.

2 (Whereupon, the above-entitled matter
3 went off the record at 9:04 a.m. and resumed at
4 9:05 a.m.)

5 COURT REPORTER: All right. We're back
6 on the record at 9:05 a.m.

7 MR. LESKO: Okay, Dr. Wolfe, I'm going
8 to start with some ground rules here. First,
9 during the deposition, you should only have the
10 Zoom meeting, the documents folder and any other
11 document that we are discussing during the
12 deposition on your screen. Can you confirm that
13 you agree with that?

14 THE WITNESS: Yep. That's fine.

15 BY MR. LESKO:

16 Q And currently, do you have anything else
17 open on your computer aside from the documents
18 folder and the Zoom meeting?

19 A I'm not sure what you mean by open, but
20 I only see the Zoom window and the documents
21 folder. I mean, I guess I have I still have a
22 web browser open to the Box.

23 Q Okay. So you have a web browser to Box
24 and the folder and the Zoom meeting and nothing
25 else is on your computer right now, like, that's

1 usable.

2 A I mean, I'm sure there's stuff running
3 in the background, but there's nothing else that
4 I can see.

5 Q Okay. And throughout the deposition,
6 you cannot have any chats open with colleagues or
7 with Ms. Weiskopf. Do you agree with that?

8 A I'm not sure what the rules are. I mean
9 certainly don't have any communications with
10 anybody while we're on the record.

11 Q Yeah. Can we just agree that we're not
12 going to have any communications like that while
13 we're on the record? It's just hard because
14 we're in a Zoom meeting. I want to make sure.

15 A No, that's fine.

16 Q Okay. And I'll ask some of my questions
17 slowly. Can you please let me finish the
18 question before answering?

19 A I will do my best.

20 Q Okay. And if you don't understand a
21 question, will you let me know, and then I'll try
22 to rephrase it for the record?

23 A I will try to do that.

24 Q And if you answer a question, I'll
25 assume you understood the question. Is that

1 okay?

2 A Okay.

3 Q And if you need a break at all during
4 the deposition, you can request one, but please
5 try to answer any pending question before we try
6 to take a break.

7 A Okay.

8 Q Is there any issue today, such as an
9 illness or a personal issue that would impair
10 your ability to testify fully and accurately
11 today?

12 A Not at the present time.

13 Q Okay. Can you please state your full
14 name and address for the record.

15 A Andrew Wolfe. Do you want the address
16 of my office where I am right now or do you want
17 my home address?

18 Q Your office address is fine.

19 A 2005 De La Cruz Boulevard, Suite 142,
20 Santa Clara, California 95050.

21 Q Okay. And you have submitted a claim
22 construction declaration on behalf of T-Mobile
23 US, Inc. and T-Mobile USA, Inc. in this matter,
24 is that correct?

25 A Yes.

1 Q And for convenience during our
2 deposition, I'll refer to the Defendants
3 collectively as T-Mobile and to the Plaintiff as
4 CEV. Is that okay?

5 A I will understand that.

6 Q Thank you. So in preparing for today's
7 deposition, did you review your declaration that
8 we just mentioned in this case?

9 A Yes.

10 Q In preparing for today's deposition, did
11 you review the declaration of Dr. Hughes?

12 A Not since I wrote my declaration, no.

13 Q Okay. And in preparing for today's
14 deposition, did you review the patents at issue
15 in this case, U.S. patent numbers 10,063,761 and
16 11,153,472?

17 A Yes.

18 Q In preparing for today's deposition, did
19 you read the file histories of either of those
20 patents?

21 A Portions of it. I pulled it up online
22 at the Patent Office, and I read the portions
23 that I thought would be relevant.

24 Q Okay. In preparation for today's
25 deposition, did you read Plaintiff's Proposed

1 Constructions dated January 3rd, 2025?

2 A No.

3 Q And in preparing for today's deposition,
4 did you read Defendant's Amended Preliminary
5 Proposed Claim Constructions dated February 20th,
6 2025?

7 A No, I believe I was provided with
8 excerpts from each of those that I've included in
9 my declaration. But other than that, I did not
10 read them.

11 Q Okay. Is there anything -- now today,
12 right now, I'm just talking about today's
13 deposition, not the declaration. Was there
14 anything else that you reviewed to prepare for
15 today's deposition?

16 A I reviewed portions of the file history
17 of some of the parent applications.

18 Q Okay. Would that be, U.S. patent number
19 9,936,116, which is referenced in your
20 declaration in this matter?

21 A Yes. I also briefly reviewed the issued
22 patents from some of the predecessors.

23 Q Okay. So other CEV patents that are
24 related to the asserted patents here, the '761
25 patent and the '472 patent. You reviewed those

1 patents as well, you're saying?

2 A I looked at portions of those where the
3 file history would have indicated to me that they
4 should have had the same specification.

5 Q Okay. Is there anything else that you
6 reviewed in preparing for today's deposition that
7 we haven't discussed?

8 A Not that I can recall.

9 Q How much time did you spend preparing
10 for today's deposition?

11 A After having prepared the declaration?

12 Q Yeah, just for today's deposition.
13 Unrelated to the declaration preparation.

14 A I don't know exactly, but, ballpark
15 eight to 12 hours.

16 Q Okay. Did you meet with Ms. Weiskopf?

17 A Over video link.

18 Q And how many times did you meet with Ms.
19 Weiskopf?

20 A Twice.

21 Q And for how long were those meetings?

22 A The first one was about three hours, I
23 believe. Second one, maybe ten minutes.

24 Q Did you meet with anyone else to prepare
25 for today's deposition?

1 A No

2 Q So, I know you're here on behalf of T-
3 Mobile. Is that correct?

4 A They have retained me. I'm here to give
5 my own opinions, but at their request.

6 Q Okay. And so related to that, the
7 opinions that you're giving are supposed to be
8 honest and given on an informed basis to the
9 court. Do you agree?

10 A I do.

11 Q Okay, I don't know if you're familiar
12 with this rule, but there's a Rule 702 for
13 experts that says the testimony is supposed to be
14 based on sufficient facts or data. Do you agree
15 that the testimony that you are to provide to the
16 court should be based on sufficient facts or
17 data?

18 A I do.

19 Q Okay. And do you understand that as a
20 retained expert, your testimony should assist the
21 court in understanding the evidence? Is that
22 right?

23 A That's my understanding.

24 Q Okay. And do you agree that your
25 testimony should not omit relevant facts that

1 could impact the court's analysis of the
2 technical matters?

3 A Yes. As I understand that, I would not
4 want to admit any facts that are relevant to the
5 topic at issue.

6 Q And just to clarify, you meant to say
7 you would not want to omit any facts, right?

8 A Yes, O-M-I-T.

9 Q Understood. So if there was evidence
10 that was unhelpful to T-Mobile, you would still
11 be obligated to address that evidence. Is that
12 right?

13 MS. WEISKOPF: Objection. This is legal
14 issues. If you've got something you want to show
15 him, you should just show him.

16 MR. LESKO: Oh. So the question is, if
17 there's certain evidence that was unhelpful for
18 T-Mobile, would you still be obligated to address
19 it, Mr. Wolfe?

20 MS. WEISKOPF: I renew my objection.

21 THE WITNESS: I don't know. Again,
22 that's a complicated legal question. I think
23 that the court would have to determine whether or
24 not there was relevance, whether or not it was
25 within the scope of my testimony. I think it's

1 more complicated than a yes or no answer, but I
2 certainly am always trying to do my best to give
3 full and complete answers to the, questions
4 relevant to my testimony without regard to
5 whether or not they're helpful for T-Mobile or
6 CEV.

7 MR. LESKO: In forming your opinions in
8 this case, you reviewed certain materials. Is
9 that correct?

10 THE WITNESS: Yes

11 BY MR. LESKO

12 Q And you listed those materials in your
13 declaration, is that correct?

14 A Yes. I've done my best to list them all
15 as best as I can recall.

16 Q And so the materials you reviewed, you
17 selected because you think they're relevant and
18 important to your analysis. Is that correct?

19 A Well, not necessarily everything that I
20 reviewed is relevant or important, but if I
21 reviewed it and then determined that it wasn't
22 relevant, I may have still disclosed it.

23 Q Okay. So during your review, you might
24 have reviewed certain materials and then
25 determined after reviewing them that either

1 they're not relevant or parts of them might not
2 be relevant.

3 A That's certainly possible.

4 Q So if you look in the Box folder you
5 provided, there's a Plaintiff's Exhibit 1. Can
6 you pull that up or download it, whichever is
7 easier for you?

8 (Whereupon, the above-referred to
9 document was marked as Plaintiff's Exhibit No. 1
10 for identification.)

11 A Okay.

12 Q Okay. So Plaintiff's Exhibit 1, take a
13 few minutes, a few seconds to look it over. And
14 can you confirm that Exhibit 1 is your
15 declaration that you submitted in this matter and
16 that it bears your signature?

17 A Based on my cursory review, it appears
18 to be.

19 Q Okay. And if you scroll down to PDF
20 Page 203, which is, I think, Page 201 in the
21 document, you should see your signature page.
22 Let me know when you get there.

23 A I see it.

24 Q Okay. Is that your signature on the
25 page there?

1 A Yes.

2 Q Okay. So your declaration says there on
3 that page, under penalty of perjury, under the
4 laws of the United States of America, to the best
5 of my knowledge, the foregoing is true and
6 correct. Do you see that?

7 A I see that.

8 Q Okay. And you're aware of the
9 seriousness of that?

10 A I am.

11 Q And you believed that statement at the
12 time of your declaration when you signed it?

13 A I did.

14 Q And you said you reviewed your
15 declaration in preparing for today's deposition.
16 Is that right?

17 A Yes.

18 Q And do you still believe that everything
19 in your declaration is true and correct?

20 A As far as I'm aware.

21 Q And if you discovered something in your
22 declaration that was untrue or incorrect during
23 today's deposition, would you change your
24 testimony?

25 MS. WEISKOPF: Object to form. This is

1 vague.

2 THE WITNESS: We'd have to look at it on
3 a case by case basis. I would acknowledge if
4 something is incorrect. I think the nature of
5 the error would determine whether or not my
6 testimony changes.

7 MR. LESKO: Sure. So if you saw an
8 error in there that needed to be corrected, you
9 would be able to correct it on the record today?

10 MS. WEISKOPF: Object to form,
11 speculative.

12 THE WITNESS: Again, we'd have to see
13 it. But if I'm able to correct it on the record,
14 I would do so.

15 MR. LESKO: So just to confirm, the
16 testimony you are providing today will also be
17 true and correct to the best of your knowledge.
18 Is that right?

19 THE WITNESS: Yes. I will do my very
20 best to give true and correct testimony today.

21 BY MR. LESKO:

22 Q And did you write this declaration
23 yourself? Exhibit 1?

24 A Not every word. I prepared the
25 declaration, but I did not write every word.

1 Q Okay. Did you review it carefully
2 before you signed it?

3 A I did.

4 Q And did any of T-Mobile's lawyers draft
5 portions of this declaration for you?

6 MS. WEISKOPF: Objection under Rule 26.
7 You can answer, but you can't reveal any
8 privileged communications, Dr. Wolfe.

9 THE WITNESS: Yes.

10 MR. LESKO: Do you recall what portions
11 were written by T-Mobile's lawyers?

12 THE WITNESS: Certainly the legal
13 standards were provided by T-Mobile's lawyers.
14 And then there were other portions and I don't
15 recall exactly which ones that were the result of
16 discussions I had with T-Mobile's lawyers, where
17 I explained my opinions, and then in some cases,
18 they recorded those opinions into a first draft.

19 BY MR. LESKO:

20 Q Okay. So in some instances, the first
21 draft was handled by the lawyers and then
22 reviewed by you?

23 A With certain language, that is true.
24 Yes. But again, anything that involved my
25 opinion originated from me.

1 Q What -- when you say certain language,
2 do you have any -- can you point out which
3 portions might have been drafted by the lawyers
4 first, aside from the legal section, which you've
5 already mentioned.

6 MS. WEISKOPF: I'm going to continue to
7 object under Rule 26 and privileged
8 communications. Dr. Wolfe, please don't reveal
9 anything privileged.

10 THE WITNESS: I actually don't recall.

11 MR. LESKO: What percentage of the
12 sections do you think were drafted by the lawyers
13 first, roughly?

14 THE WITNESS: I haven't tried to
15 estimate that, I don't know, I mean, in this
16 particular declaration, 80 percent plus, I
17 believe is just raw evidence and wasn't drafted
18 by anybody at T-Mobile or anybody on the T-Mobile
19 legal team or me. About 80 percent of it is just
20 quoted evidence.

21 BY MR. LESKO:

22 Q So you're referring, for example, to
23 pages -- just looking at your declaration, pages
24 15 through, let's say -- pages 15 through 165
25 show, I mean, I think you'll agree with me,

1 there's excerpts from the file histories. Is
2 that what you're referring to as the quoted
3 evidence, Page 15 through 165?

4 A That is the bulk of the quoted evidence.

5 Q Okay. So then pages, let's just focus
6 on then pages, and I think we already talked
7 about the introduction and some of the legal
8 discussion. So let's just focus on pages 166
9 through, I don't know, I guess the end of the
10 declaration, which is Page 201. So pages 166 to
11 201. Do you recall which sections there were
12 drafted by the T-Mobile lawyers?

13 MS. WEISKOPF: And again, I'm going to
14 object to privileged communications. Please
15 don't reveal anything privileged, Dr. Wolfe.

16 THE WITNESS: So everything was based on
17 the opinions that I developed and discussed with
18 the attorneys. But I don't recall which text I
19 drafted originally and which text was drafted by
20 attorneys that I then reviewed and approved.

21 MR. LESKO: Okay. So percentage wise,
22 one page - this very specific page range. I'm
23 talking about pages 166 to 201. What percentage
24 of that did you draft first?

25 MS. WEISKOPF: Objection. Asked and

1 answered.

2 THE WITNESS: No, I think I've already
3 answered that I don't have that number.

4 MR. LESKO: So you have no idea which
5 parts were drafted by you or the lawyers between
6 pages 166 and 201?

7 MS. WEISKOPF: Objection. Asked and
8 answered.

9 THE WITNESS: I don't believe -- I
10 explained to you how it was prepared.

11 MR. LESKO: So in forming -- in drafting
12 the declaration, was there any limits placed on
13 what materials you could review to draft your
14 declaration?

15 MS. WEISKOPF: Objection, please don't
16 reveal anything privileged, Dr. Wolfe.

17 THE WITNESS: I'm not aware of any.

18 MR. LESKO: So, for example, if you --
19 did you ever request additional materials to
20 review and then they weren't provided to you?

21 THE WITNESS: I'm sorry, did you ask,
22 did I ever request materials that were not
23 provided to me?

24 BY MR. LESKO:

25 Q Yeah. Did you ask, for example, did you

1 ask counsel, T-Mobile's lawyers to provide you
2 with a document to review and they said, no?

3 A That did not happen. Every time I asked
4 for a document to review, it was provided.

5 Q So when it came to what documents you
6 reviewed, did you make that decision or did T-
7 Mobile's lawyers guide you?

8 MS. WEISKOPF: You know, objection.
9 This is really getting into privileged
10 communications. Please don't reveal any
11 communications between counsel, Dr. Wolfe.

12 THE WITNESS: I'm not quite sure how to
13 answer that without revealing privilege.
14 Certainly counsel informed me what the patents
15 were that were in this case, right? I didn't come
16 up with that on my own. But there were other
17 situations where I asked to review additional
18 documents.

19 MR. LESKO: So if you could in Exhibit
20 1, turn to the PDF, Page 7. There's a Paragraph
21 18. Let me know when we get there, Dr. Wolfe.

22 THE WITNESS: I see that.

23 BY MR. LESKO:

24 Q Okay, great. So in Paragraph 18, we
25 don't have to read it out loud. Just read it to

1 yourself. There is a list of -- it's a bullet
2 pointed list of five items. And it says you have
3 reviewed the following materials in addition to
4 any documents cited herein. And there's five
5 items listed. Do you see that?

6 A Yes.

7 Q Is that list a complete and accurate
8 record of everything you reviewed in preparing
9 your declaration?

10 MS. WEISKOPF: Objection.

11 THE WITNESS: As best as I can recall,
12 yes.

13 MR. LESKO: So you don't know of any
14 other documents beyond those listed here that you
15 reviewed in preparing your declaration?

16 THE WITNESS: I don't recall any.
17 Clearly, if I cited any other documents in the
18 declaration, I must have reviewed them and I
19 could have missed them in making this list. But
20 this is what I recall having reviewed.

21 MR. LESKO: Was there any materials that
22 you intentionally avoided reviewing in preparing
23 the declaration?

24 MS. WEISKOPF: Objection. This has been
25 asked and answered.

1 THE WITNESS: No.

2 MR. LESKO: I'm sorry. Did you answer
3 the question?

4 THE WITNESS: Yeah, I said no.

5 BY MR. LESKO:

6 Q Oh, okay. I didn't hear you. And in
7 preparing your declaration, did you conduct any
8 independent research for other materials that may
9 have been relevant to your declaration?

10 A No.

11 Q Did you review any other litigation
12 documents prior to preparing your declaration?
13 Did you review any infringement contentions from
14 CEV, for example?

15 MS. WEISKOPF: Objection, vague.

16 THE WITNESS: I have not reviewed any
17 infringement contentions.

18 MR. LESKO: Okay. I'll represent to
19 you, yes, CEV served on T-Mobile some
20 infringement contentions in this matter. Did you
21 review anything like that in preparing your
22 declaration?

23 MS. WEISKOPF: Objection, vague.

24 THE WITNESS: No.

25 MR. LESKO: So I also represent to you

1 that T-Mobile served some invalidity contentions
2 in this matter upon CEV. Did you review any
3 invalidity contentions prior to preparing your
4 declaration?

5 THE WITNESS: No, I did not review any
6 invalidity contentions with respect to this
7 matter.

8 BY MR. LESKO:

9 Q Okay. So, and now we're talking about
10 not just for preparing your declaration. Just
11 you have not seen any invalidity contentions
12 relating to this matter ever. Is that your
13 testimony?

14 A Correct.

15 Q Okay. So attached to the declaration,
16 if you scroll down to PDF Page 205 is where it
17 begins, that's your CV starting there on Page
18 205. Is that correct?

19 A Yes, as of mid-February.

20 Q And as shown in your CV, you've provided
21 expert testimony in a number of cases. Is that
22 correct?

23 A Yes.

24 Q Do you review any prior expert testimony
25 in preparing this declaration, Exhibit 1?

1 A Oh, make sure I answer the question you
2 asked. I reviewed some testimony from Dr.
3 Hughes, and I reviewed some declarations that
4 were in the file history, but I did not review
5 any of my own prior expert testimony in preparing
6 this declaration.

7 Q Okay. And you're right. That was my
8 question. Did you review your own prior
9 testimony regarding this expert declaration?

10 A I did not.

11 Q So now we're going to scroll up to
12 Paragraph 24 of this exhibit. Paragraph 24, if
13 you're there, it says my qualifications and
14 experience made me, at least, a person of
15 ordinary skill in the art. Can you see that?

16 A Yes.

17 Q Okay. Does that also mean you're
18 qualified as an expert to provide testimony in
19 this matter?

20 MS. WEISKOPF: Object to form, it's a
21 legal issue.

22 THE WITNESS: I believe that I'm
23 qualified to provide testimony on the issues that
24 I am providing testimony on. There are going to
25 be many other issues in this case where the

1 expertise required is different than mine.

2 MR. LESKO: Okay. So for purposes of
3 claim construction, as of 2005, you were at least
4 a person of ordinary skill in the art?

5 THE WITNESS: I believe so. Again, the
6 court may, define the qualifications of a person
7 of ordinary skill in the art at some point and at
8 that point I would reevaluate. But under my
9 understanding of what is required of a person of
10 ordinary skill in the art, I am at least a person
11 of ordinary skill in the art, and was, as of
12 2005.

13 BY MR. LESKO:

14 Q Okay. If you could scroll up again to
15 Paragraph 18. Like I said, I asked you a few
16 questions about the amount of time you spent
17 revealing each of the materials listed here. If
18 you could help me with that. So looking at U.S.
19 patent number 10,063,761, in preparing your
20 declaration, about how much time did you spend
21 reviewing that?

22 A I don't recall.

23 Q I'm sorry, I couldn't hear your answer.

24 A I don't recall.

25 Q Okay. Did you take notes as you were

1 reviewing it?

2 A No.

3 Q Did anyone assist you in reviewing these
4 documents, like do you have another expert or
5 somebody at your group that helps you with
6 reviewing documents like these?

7 A No.

8 Q But you received some guidance from
9 counsel on what to review in these patents -- in
10 this patent, I should say?

11 A I was told what claims are at issue in
12 the case, but that's the only guidance I
13 received.

14 Q Okay. So let's do this again, for
15 patent number 11,153,472, do you know how much
16 time you spent reviewing that patent in preparing
17 your declaration?

18 A I don't.

19 Q And did anyone assist you with reviewing
20 it?

21 A No.

22 Q Were you limited in the amount of time
23 you could spend reviewing either the '761 patent
24 or the '472 patent?

25 A No.

1 Q Okay. So let's go to the next item, the
2 file history. So here in your declaration,
3 Paragraph 18, you list three file histories that
4 you reviewed in preparing your declaration. Do
5 you agree with me?

6 A Yes.

7 Q Do you recall how much time you spent
8 reviewing the file histories?

9 A I do not.

10 Q And did you take notes as you were
11 reviewing those file histories?

12 A No.

13 Q And did anyone assist you in reviewing
14 the file histories, someone else at your firm or
15 another expert?

16 A No, I discussed them at certain points
17 in time with counsel. But no one else.

18 Q Okay. And for the file histories, was
19 there any portions of them that you skimmed, let
20 me ask you this first. I'm sorry. Withdraw the
21 question. For each of the file histories listed
22 in Paragraph 18, did you read it from start to
23 finish?

24 MS. WEISKOPF: Objection, vague.

25 THE WITNESS: I had the entire file

1 history available to me, but there were sections
2 that I did not read carefully that involve things
3 like whether or not fees were paid on time, and
4 other things that simply weren't relevant to my
5 opinions.

6 MR. LESKO: Okay. So at times did you
7 skim the file histories? Is that accurate? You
8 skimmed through them or skipped over parts that
9 seemed irrelevant to you?

10 MS. WEISKOPF: Object to form. Asked
11 and answered.

12 THE WITNESS: I only skimmed parts that
13 I didn't think would constitute the intrinsic
14 record, so I carefully read all the parts in
15 which there were representations made by the
16 applicant, and where there was feedback provided
17 by the examiner. Those are the portions that
18 were relevant to me, including amendments and
19 summaries of interviews and things like that.

20 MR. LESKO: Did you run searches for
21 terms as well when you looked at the file
22 histories? Like a Ctrl-F to try to find certain
23 words?

24 THE WITNESS: Not in preparing the
25 declaration. I don't think I did.

1 BY MR. LESKO:

2 Q And let's circle back to the patents for
3 a moment. So for those, U.S. patent numbers
4 10,063,761 and 11,153,472, did you read the
5 entire patent from start to finish?

6 A Yes.

7 Q So some of the patents have references
8 cited at the beginning of the patents. Did you
9 pull up any of those references or just skip past
10 that part?

11 MS. WEISKOPF: Objection, compound.

12 THE WITNESS: Are you referring to the
13 elements listed in as a result of the prior art
14 search?

15 MR. LESKO: Let's just pull up, if you
16 could, Plaintiff's Exhibit 2. That'll make this
17 simpler. In the Box folder. Let me know when
18 you get there, Dr. Wolfe, please.

19 (Whereupon, the above-referred to
20 document was marked as Plaintiff's Exhibit No. 2
21 for identification.)

22 THE WITNESS: Okay, I have that.

23 BY MR. LESKO:

24 Q Thank you. So if you look at the patent
25 starting mostly on Page 2 through Page 4, there's

1 various references cited, I think those are
2 references that were cited during prosecution.
3 Did you skip over that part, or did you read all
4 that?

5 A I read --

6 MS. WEISKOPF: Object to form, vague.

7 THE WITNESS: I read the text that is in
8 the '761 patent. I did not pull up each and
9 every one of those documents and review them. in
10 some cases where the examiner referred to
11 specific quotations in the file history, I did
12 verify those.

13 MR. LESKO: So if there is a rejection,
14 for example, in the file history that involved
15 one of these prior art references, you would have
16 actually pulled up the reference or just read
17 what the examiner said about it?

18 THE WITNESS: In some cases I verified
19 the quote, but I did not read the entire
20 reference and determine whether or not the
21 examiner had cited to the best portion, for
22 example.

23 BY MR. LESKO:

24 Q Okay. So for the -- and maybe to save
25 time, I won't pull up the '472 patent. But so

1 the '472 patent, would it be the same that the
2 references cited section that we just referred to
3 that starts on Page 2, would you have read the
4 names of the documents but not the actual
5 documents?

6 A Correct.

7 MS. WEISKOPF: Objection,
8 mischaracterizes testimony.

9 THE WITNESS: I mean, there may have
10 been cases where I've read the documents
11 previously. I recall certain ones. I think,
12 some of the touchscreen patents in particular,
13 but, I did not go through each one of the what I
14 believe is probably more than a hundred documents
15 that were listed as references cited and review
16 each one.

17 MR. LESKO: So, if you could, let's turn
18 back to Plaintiff's Exhibit 1 and Paragraph 18
19 that we were reviewing.

20 So, the next item listed is the expert
21 declaration of Dr. Hughes dated December 12th,
22 2022. Do you see that?

23 THE WITNESS: Yes.

24 BY MR. LESKO:

25 Q How much time did you spend reviewing

1 that document --

2 A I don't recall.

3 Q -- in preparing your declaration?

4 A I do not recall.

5 Q Did anyone assist you in reviewing that
6 document?

7 A No.

8 Q And did you read that one from start to
9 finish, the Dr. Hughes declaration?

10 A I believe I did at one point.

11 Q Was there any parts of it that you
12 decided to skim instead of reading carefully?

13 A I only skimmed his CV.

14 Q The CV?

15 A Yeah.

16 Q So did you feel like you spent
17 sufficient time reviewing the Dr. Hughes
18 declaration to understand it?

19 MS. WEISKOPF: Object to form.

20 THE WITNESS: I spent sufficient time to
21 understand it for purposes of the opinion that I
22 put in my declaration.

23 MR. LESKO: And was there any parts of
24 it that you were told to ignore or not review?

25 THE WITNESS: No.

1 BY MR. LESKO:

2 Q The last two documents here are
3 Plaintiff's Proposed Constructions, dated January
4 3rd, 2025, and Defendant's Amended Preliminary
5 Proposed Claim Constructions, dated February
6 20th, 2025. Do you see that in Paragraph 18 of
7 Plaintiff's Exhibit 1?

8 A Yes.

9 Q And did you read those from start to
10 finish? Did you read those entire documents and
11 review them?

12 A No.

13 Q What parts did you not read?

14 A I only looked at the parts that were
15 relevant to the term that I opined on.

16 Q Okay. So where there was -- the
17 disputed claim terms listed, aside from the
18 controller and the means-plus-function debate,
19 you ignored those claim terms like the device and
20 the periods in the preamble discussion?

21 MS. WEISKOPF: Object to form,
22 mischaracterizes testimony.

23 THE WITNESS: I did not carefully review
24 portions that were not related to the claim terms
25 that I've opined on.

1 MR. LESKO: And how many claim terms did
2 you opine on?

3 THE WITNESS: Well, there's some
4 semantics involved. Maybe I'd characterize it as
5 three. They're very similar, but they're
6 separately written out in different claims.

7 BY MR. LESKO:

8 Q Let's make it a little easier. So if we
9 look at Plaintiff's Exhibit 1, starting on Page
10 168 --

11 (Simultaneous speaking.)

12 Q -- PDF Page 171, there's a list of three
13 disputed claim terms. Do you see that?

14 A Yes.

15 Q Table, I should say. It's in a table
16 format, right?

17 A Yes.

18 Q Okay. So in the claim construction
19 documents from CEV and from T-Mobile that you
20 reviewed, did you focus solely on those three
21 terms?

22 THE WITNESS: Yes.

23 MS. WEISKOPF: Object to form,
24 mischaracterizes testimony.

25 THE WITNESS: I did.

1 MR. LESKO: We'll scroll back up to
2 Paragraph 18 of your declaration and move on.
3 Are you confident your review of the materials in
4 Paragraph 18 was careful and thorough?

5 THE WITNESS: Yes, for the purposes that
6 I reviewed them, which was for preparation of
7 this declaration.

8 MR. LESKO: So you believe you met your
9 obligation as an expert to consider all relevant
10 information that was in these documents?

11 MS. WEISKOPF: Object to form.

12 THE WITNESS: Yes.

13 MR. LESKO: So you didn't feel like your
14 review of this case was rushed or you were told
15 to ignore certain evidence or anything like that?
16 You felt like you had a full consideration of
17 the evidence listed in Paragraph 18? Is that
18 correct?

19 MS. WEISKOPF: Object to form, asked and
20 answered.

21 THE WITNESS: I felt that I -- I felt
22 that I was given the freedom, and also that I
23 actually performed a complete review of the
24 relevant materials.

25 MR. LESKO: Dr. Wolfe, if you could

1 please download or open the Plaintiff's Exhibit
2 4. It's been marked in the deposition folder.
3 And let me know when you have that in front of
4 you.

5 (Whereupon, the above-referred to
6 document was marked as Plaintiff's Exhibit No. 4
7 for identification.)

8 THE WITNESS: I do have it.

9 BY MR. LESKO:

10 Q If you could skim through this document.
11 And do you know what this document is?

12 A My understanding is that this was
13 testimony that was provided by Dr. Hughes in
14 another case relating to the same two patents.

15 Q Okay. So if you look at -- you don't
16 have to go back to your declaration. Is this the
17 -- does this look like the expert declaration of
18 Dr. Hughes dated December 12th, 2022, that's
19 listed in Paragraph 18 of Plaintiff's Exhibit 1?

20 A It appears to be. It has the same
21 docket number.

22 Q Okay. And so according to Paragraph 18
23 of Plaintiff's Exhibit 1, your declaration, you
24 reviewed this document of Dr. Hughes. Is that
25 correct?

1 A I did.

2 Q If you turn to Paragraph 12 of
3 Plaintiff's Exhibit 4. Are you there?

4 A Yes.

5 Q Did you see the list of materials in
6 Paragraph 12? There's Materials A through T in
7 Paragraph 12. It's a list. Do you see that?

8 A Yes.

9 Q So you read Paragraph 12 of Dr. Hughes's
10 declaration before finalizing the declaration.
11 Is that correct?

12 A Yes.

13 Q Now, looking at Paragraph 12, if you can
14 tell me by letter indication which of these
15 documents A through T did you review while you
16 were drafting your declaration that you submitted
17 in this matter?

18 A I don't want to go through some matching
19 exercise here. I've already told you and
20 disclosed the documents that I reviewed.

21 Q Okay, so I'll help you. So, A and B are
22 the patents, and you reviewed those. So, here in
23 Exhibit 4, there's 12a and 12b. You viewed both
24 of those. Is that right?

25 A As I said, I've already told you in

1 writing and in answering your questions exactly
2 what documents I reviewed.

3 Q Okay. 12c is a portion of the
4 prosecution history and you said you review that
5 prosecution history. Is that correct?

6 A I did review portions of the prosecution
7 history of the 9,936,116 patent.

8 Q Okay. 12d and 12e, those are also --
9 yeah, you already said 12d. You said you
10 reviewed the '761 patent file history, right?

11 A I did. Again, I haven't seen those
12 particular Bates numbers, but I have reviewed the
13 prosecution history of the '761 patent.

14 Q And 12e, you reviewed the prosecution
15 history of the '472 patent. Correct?

16 A Correct.

17 Q So, 12f is Defendant's Updated List of
18 Proposed Terms for Construction, and there we're
19 talking about the Defendant's TCL. Did you
20 review that document in preparing your
21 declaration?

22 A No.

23 Q Let's say 12g and h are other claim
24 construction documents from the CEV versus TCL
25 litigation. Did you review either of those in

1 preparing your declaration, Plaintiff's Exhibit
2 1, in this case?

3 A No. As I said, I told you exactly
4 multiple times what I reviewed in preparing my
5 declaration.

6 Q Can you answer the question?

7 A I did answer the question.

8 MR. LESKO: Reporter, can you read back
9 the question to Dr. Wolfe?

10 COURT REPORTER: Give me a moment.

11 (Whereupon, the record was read back.)

12 MS. WEISKOPF: I'm going to object to
13 relevance.

14 MR. LESKO: Can you answer the question,
15 Dr. Wolfe?

16 THE WITNESS: I will repeat my answer.
17 No. I have already provided you, both in writing
18 and in response to your prior questions, a list
19 of exactly what I reviewed in this case.

20 MR. LESKO: Okay. Let's say, Paragraph
21 12i, declaration of Dr. Ryan Garlick, did you
22 review that in preparing your testimony in this
23 case?

24 MS. WEISKOPF: Objection, relevance.

25 THE WITNESS: I believe I've answered

1 that already. I did not.

2 MR. LESKO: 12j, the deposition
3 transcript of Dr. Ryan Garlick taken on December
4 2nd, 2022, did you review that in preparing your
5 declaration?

6 MS. WEISKOPF: Objection, relevance.

7 THE WITNESS: As I've told you now many
8 times, that is not one of the things that I
9 relied on or reviewed in preparing my
10 declaration.

11 MR. LESKO: Okay. So 12k through 12t in
12 this Plaintiff's Exhibit 4, did you review or
13 rely on any of those documents for preparing a
14 declaration?

15 MS. WEISKOPF: Objection, relevance.

16 THE WITNESS: As I testified several
17 times now, those are not documents on the list of
18 what I reviewed or relied on for preparing my
19 declaration.

20 MR. LESKO: Do you see here that Dr.
21 Hughes states, the data or other information that
22 I considered in forming the opinions that I may
23 express in this phase of the action include those
24 detailed in the listing that follows. You see
25 that in Paragraph 12 of this Plaintiff's Exhibit

1 4, correct?

2 THE WITNESS: Yes.

3 BY MR. LESKO:

4 Q So you reviewed Dr. Hughes's
5 declaration. So everything in Paragraph 12, you
6 are aware that it existed at the time you
7 prepared your declaration? Is that right?

8 A I'm aware that it existed, yes.

9 Q Did anyone tell you to not review these
10 materials?

11 A No.

12 Q So you chose not to review the
13 materials, aside from those that you said you
14 reviewed in Paragraph 12?

15 MS. WEISKOPF: Object to form.
16 Relevance.

17 THE WITNESS: I reviewed the materials
18 that I believed at the time were relevant and
19 necessary to form the opinions that I provided in
20 my declaration. And I have provided you with a
21 list of those materials, and I have testified as
22 to what materials I reviewed. Those are the
23 materials that I chose to review.

24 MR. LESKO: Okay. So, 12f through 12t,
25 you were aware of them and you chose not to

1 review?

2 (Simultaneous speaking.)

3 MS. WEISKOPF: Objection. Asked and
4 answered.

5 THE WITNESS: Yes, I was aware of
6 thousands of documents that I did not review for
7 purposes of this declaration.

8 MR. LESKO: So you didn't mention these
9 materials in your declaration, either, did you?
10 12f through 12g in Plaintiff's Exhibit 4?

11 MS. WEISKOPF: Object to form. It's
12 vague and irrelevant.

13 THE WITNESS: My declaration stands on
14 its own. But I don't recall mentioning the
15 documents that are listed in Paragraph 12
16 Subsections f through p in my declaration.

17 MR. LESKO: So you didn't explain in
18 your declaration how these might have been
19 relevant to your opinion or not relevant to your
20 opinion?

21 MS. WEISKOPF: Object to form.

22 THE WITNESS: I've already told you I
23 don't recall mentioning them in my declaration at
24 all. I certainly did not explain in my
25 declaration every document that was not relevant

1 to my opinion.

2 MR. LESKO: So, we've been going an hour
3 here. Do you want to take a break or do you want
4 to keep going, Dr. Wolfe? I'm fine either way.

5 THE WITNESS: I'm fine either way, as
6 well.

7 MR. LESKO: All right. We can just keep
8 going. No problem. Figured I would offer.

9 BY MR. LESKO:

10 Q So let's say in Plaintiff's Exhibit 4,
11 if you could. We will turn to Paragraph 67,
12 which is on Page 25. Let me know when you get
13 there.

14 A Okay.

15 Q Are you there, Dr. Wolfe?

16 A I am.

17 Q Okay, thanks. So there's a heading
18 there, The Device. Do you see that?

19 A Yes.

20 Q Okay. So in Plaintiff's Exhibit 4,
21 Paragraph 67 through 83, are under the heading
22 The Device. Do you agree?

23 A Yes.

24 Q So, in preparing your declaration, did
25 you review these Paragraphs 67 through 83 from

1 Plaintiff's Exhibit 4?

2 A I read them. I didn't rely on them
3 because I haven't provided an opinion on the
4 phrase the device in my declaration.

5 Q So you're aware of these paragraphs in
6 Plaintiff's Exhibit 4 and you did read them?

7 A Yes.

8 Q I think you just said you didn't comment
9 on them in your declaration at all. Is that
10 correct? The declaration you submitted in this
11 matter?

12 A Correct. That is not one of the topics
13 I was asked to provide opinions on.

14 Q So were you told to ignore them or you
15 chose to ignore these Paragraphs 67 through 83?

16 MS. WEISKOPF: Objection,
17 mischaracterizes evidence -- testimony, I mean.

18 THE WITNESS: Neither. They simply were
19 not on a topic that I was asked to provide
20 testimony or opinions on.

21 MR. LESKO: That claim language, the
22 device, is that part of the claim term that you
23 opined on? Does it appear in the claim term that
24 you opined on, those words, the device?

25 MS. WEISKOPF: Objection, vague.

1 THE WITNESS: They do.

2 MR. LESKO: So is it possible a
3 discussion of the device could be relevant to
4 your discussion of the claim terms in the
5 declaration?

6 MS. WEISKOPF: Object to form. Vague.

7 THE WITNESS: I don't know what you mean
8 by it's possible. It's certainly possible that
9 it could be relevant to some discussions of those
10 claim terms, but it's not important to the
11 opinions that I provided. The opinions that I
12 provided are accurate whether or not the phrase
13 the device is indefinite.

14 BY MR. LESKO:

15 Q Okay, let's go back to Plaintiff's
16 Exhibit 4, and starting on PDF Page 30,
17 Paragraphs 84 through to 116, let's say. If you
18 could just skim through that and tell me, did you
19 read those paragraphs while you were reviewing
20 Dr. Hughes's declaration in preparing your
21 declaration in this manner?

22 A I did.

23 Q So you were clearly aware of them
24 because you read them, right?

25 A Yes.

1 Q Were you instructed to ignore them?

2 A No. As we've -- I've testified several
3 times, I was not instructed to ignore anything.

4 Q Okay. So you decided to ignore -- I'm
5 sorry. I've got to look at the paragraphs here.

6 Let me start again. Withdraw the question.

7 You decided not to comment in your
8 declaration on Paragraphs 84 through 116 of
9 Plaintiff's Exhibit 4. Is that correct?

10 MS. WEISKOPF: Objection,
11 mischaracterizes testimony.

12 THE WITNESS: I don't recall whether or
13 not I commented on any of those paragraphs. I
14 would have to go back through my declaration
15 again. My declaration is what it is. But I
16 don't recall relying, in any substantial way, on
17 that particular set of paragraphs, because those
18 paragraphs don't specifically address the topic
19 of my opinions.

20 MR. LESKO: Well, if there was an item
21 in Paragraphs 84 through -- let me start again.
22 I withdraw the question.

23 If there was an item or an opinion by
24 Dr. Hughes in Paragraphs 84 through 116 that you
25 disagreed with, would you have commented on that

1 in your declaration that you submitted in this
2 matter?

3 MS. WEISKOPF: Object to form,
4 mischaracterizes testimony.

5 THE WITNESS: Not necessarily. I was
6 asked to provide opinions in this declaration on
7 a specific set of topics. Whether or not I
8 disagree with other statements made by Dr.
9 Hughes, I was not doing a comprehensive critique
10 of all of Dr. Hughes's opinions in my
11 declaration. I was providing my opinions on
12 specific claim construction issues, and where it
13 would be helpful for the court for me to contrast
14 those with statements made by Dr. Hughes with
15 respect to that specific set of issues, I
16 included those.

17 MR. LESKO: Okay, but you certainly had
18 Paragraphs 84 through 116 in front of you, so you
19 had the opportunity to comment on them if you
20 felt it was necessary. Is that right?

21 MS. WEISKOPF: Objection to form,
22 mischaracterizes testimony.

23 THE WITNESS: I was asked to address a
24 specific set of issues in my report. I focused
25 my report on addressing that set of issues. I

1 did not address issues outside of what I was
2 asked to do, whether or not that was possible or
3 not.

4 MR. LESKO: If you look on PDF Page 30
5 of Plaintiff's Exhibit 4. It says cellular
6 network access fees. Does that term, cellular
7 network access fees, appear in the claim language
8 of elements (f)(i) and (f)(ii) of Claim 1 of the
9 '761 patent or Claims 1 and 5 of the '472 patent?

10 THE WITNESS: Those words appear as part
11 of longer phrases. So, the actual phrase in the
12 '761 patent is potential cellular network access
13 fees. Let me pull up '472 to make sure I get
14 that phrase right.

15 The phrase in the '472 is potentially
16 increased cellular network access fees. And then
17 that's further qualified in the claim.

18 MR. LESKO: Okay. So you agree that
19 these terms that are discussed in Paragraphs 84
20 through 116 of Plaintiff's Exhibit 4, they are a
21 part of the terms that you address in your
22 declaration in this matter?

23 MS. WEISKOPF: Object to form,
24 mischaracterizes testimony, asked and answered.

25 THE WITNESS: Those words do appear in

1 the functions of the two -- the three claimed
2 controller terms that I opined on, as parts of
3 longer phrases.

4 MR. LESKO: But you felt it was
5 unnecessary to carefully review or opine on
6 Paragraphs 84 through 116 that address those
7 phrases in Dr. Hughes's declaration, Plaintiff's
8 Exhibit 4?

9 MS. WEISKOPF: Object to form,
10 mischaracterizes his testimony.

11 THE WITNESS: I did review them. I
12 didn't think I needed to provide any additional
13 testimony, other than what's in my declaration,
14 in order to express the opinions that are in the
15 declaration.

16 MR. LESKO: So if there was something in
17 Paragraphs 84 through 116 that you felt you
18 needed to comment on or clarify, you would have
19 provided that opinion in your declaration in this
20 matter?

21 MS. WEISKOPF: Object to form, vague,
22 mischaracterizes testimony.

23 THE WITNESS: Again, I don't understand
24 when and how and for what purpose -- I was able
25 to express and explain the opinions that are

1 included in my declaration by using the
2 references to Dr. Hughes's declaration that are
3 present there. And I do not feel, and did not
4 feel, that I need to comment on any other
5 portions of Dr. Hughes's declaration in order to
6 express those opinions.

7 BY MR. LESKO:

8 Q Is there any explanation in your
9 declaration of how Paragraphs 84 through 116 of
10 Plaintiff's Exhibit 4 influenced your opinions in
11 your declaration?

12 A I don't recall. Would you like me to go
13 through the declaration and look?

14 Q Another way to say it is this: if it's
15 not in there, if you don't refer to 84 through
16 116 at all, did it have any impact on the opinion
17 that you offered in your declaration?

18 MS. WEISKOPF: Object to form. Vague.

19 THE WITNESS: And as I testified before,
20 I cited to every portion of Dr. Hughes's
21 declaration that was necessary for me to express
22 the opinions that are in my declaration. I read
23 additional portions, but I did not find
24 commenting on them to be necessary in order to
25 express the opinions that are in my declaration.

1 BY MR. LESKO:

2 Q I think earlier when we were discussing
3 your declaration you referred to the fact that
4 you were aware of prior proceedings involving
5 these same patents. Does that -- let me ask you
6 a different way. Are you aware that these
7 patents were involved in prior litigation, ones
8 that you comment on in your declaration,
9 Plaintiff's Exhibit 1?

10 A It is my understanding that Plaintiff's
11 Exhibit 4 is a document from a prior litigation.

12 And so that means that it is my understanding
13 that the two patents at issue here were at issue
14 in a prior litigation.

15 Q And when did you become aware of that
16 fact?

17 A When I saw Plaintiff's Exhibit 4.

18 Q So you were provided this declaration
19 and that made you aware of the prior litigation
20 proceedings? Is that a fair characterization?
21 Plaintiff's Exhibit 4 was given to you, and then
22 you became aware that the patents were involved
23 in litigation?

24 A Yes.

25 Q Do you know that there was a Markman

1 proceeding in that prior CEV v. TCL case that's
2 captioned here in Plaintiff's Exhibit 4?

3 A I don't know one way or another whether
4 or not there was a hearing.

5 Q Did you ask if there was a hearing? Did
6 you ask counsel, for example, if there was a
7 hearing involving these patents?

8 A No.

9 Q Plaintiff's Exhibit 4, if you look at
10 Paragraph 12h, it refers to Defendant's Opening
11 Claim Construction Brief. Did you read -- I
12 think earlier you said you did not review
13 Defendant's Opening Claim Construction Brief,
14 item 12h on this list. Is that correct?

15 A That's correct.

16 Q Did you ask for item 12h?

17 A No. TCL's positions in a related case
18 were not relevant to the opinions that I
19 presented.

20 Q And what about opinions of TCL's expert
21 in a related case? Would those be relevant?

22 A No. I formed my opinions independently.
23 I did not base them on Dr. Garlick. I assume
24 that's who you're referring to. I did not base
25 any of my opinions on Dr. Garlick's opinions.

1 Q So you never even have seen Dr.
2 Garlick's opinion, is that correct?

3 A I believe Dr. Hughes may have cited one
4 or two of them, or repeated one or two of them,
5 but that would be the only way I would have seen
6 it.

7 Q So any testimony of Dr. Garlick that
8 you've seen would have been only what's cited in
9 Plaintiff's Exhibit 4, Dr. Hughes's declaration,
10 is that correct?

11 A That's my recollection.

12 Q And so, just to keep this simple, it
13 sounds like you did not review any claim
14 construction briefing, oral arguments, or other
15 litigation documents that were part of the CEV v.
16 TCL proceeding, as captioned here on Plaintiff's
17 Exhibit 4. Is that right?

18 A I'm not sure I understand the question.
19 As we've discussed, I have reviewed Dr. Hughes's
20 declaration.

21 Q Yeah, maybe that's an easier way to
22 phrase the question. And I apologize, it was a
23 vague question. Let's try again.

24 Plaintiff's Exhibit 4 is the Dr. Hughes
25 declaration from Cutting Edge Vision v. TCL.

1 And aside from that document, did you review any
2 other documents from Cutting Edge Vision v. TCL
3 in preparing your declaration in this matter?

4 A Not that I can recall. But, as I said,
5 I've disclosed, either through citations or
6 through listing, all the documents that I relied
7 on in preparing my declaration.

8 MR. LESKO: Would we be able to take a
9 short break here? Is that okay with everybody?

10 MS. WEISKOPF: Yeah. How long would you
11 like, Justin?

12 MR. LESKO: Just five minutes. Just to
13 use the bathroom.

14 MS. WEISKOPF: Okay. Thank you.

15 MR. LESKO: Thanks, everyone.

16 COURT REPORTER: Sounds good. We're off
17 the record.

18 (Whereupon, the above-entitled matter
19 went off the record at 10:24 a.m. and resumed at
20 10:31 a.m.)

21 COURT REPORTER: We are back on the
22 record at 10:31 a.m. Pacific.

23 BY MR. LESKO:

24 Q So, just a bit of housekeeping here, Dr.
25 Wolfe. Can you look at Plaintiff's Exhibit 3 in

1 the Box folder, please?

2 A Okay.

3 Q Do you recognize that document?

4 A Yes.

5 Q So is that U.S. Patent number 11,153,472
6 that we've been discussing and that you discussed
7 in your declaration?

8 (Whereupon, the above-referred to
9 document was marked as Plaintiff's Exhibit No. 3
10 for identification.)

11 A It appears to be.

12 Q Okay. So, Dr. Wolfe, if you could
13 please pull up Plaintiff's Exhibit 5. Have you
14 ever seen this document before, Plaintiff's
15 Exhibit 5?

16 (Whereupon, the above-referred to
17 document was marked as Plaintiff's Exhibit No. 5
18 for identification.)

19 A I don't recall having seen this before.

20 Q Okay. So this Plaintiff's Exhibit 5,
21 you've never seen. It wasn't considered as part
22 of the materials reviewed to prepare your
23 declaration?

24 A It was not. As we've discussed a number
25 of times, I've already told you what materials I

1 considered.

2 Q Okay. So, Dr. Wolfe, are you familiar
3 with the term microprocessor?

4 A Yes.

5 Q What is a microprocessor?

6 A I think it depends on the context and
7 the timeframe.

8 Q So, let's say as of 2005, October of
9 2005, how would you describe a microprocessor?

10 A Again, I think it would depend on the
11 context, but it would be common at that time to
12 use that phrase to describe the primary computing
13 component of a general purpose computer that
14 would perform different computing tasks based on
15 how it was programmed.

16 Q So the phrase, the word microprocessor,
17 does that typically refer to a physical item?

18 A Again, it depends on the context, but
19 typically it would be a physical item.

20 Q So were you ever aware of someone using
21 the term microprocessor to refer to something
22 that wasn't physical?

23 A Yes.

24 Q And how would that happen?

25 A During the design and development phases

1 microprocessors are modeled. They're simulated.
2 They are virtualized. They are emulated. So
3 there are exceptions, depending on context, to
4 using that term necessarily for a physical
5 object. But certainly it was most common to use
6 that term to refer to a physical object.

7 Q Would you say that's usually a
8 structural object, too, the microprocessor?
9 Like, an object that has structure?

10 MS. WEISKOPF: Objection, vague.

11 THE WITNESS: I think that's a legal
12 term. A person of ordinary skill in the art
13 typically would not talk about whether or not a
14 microprocessor had structure.

15 MR. LESKO: But you discuss structure in
16 your declaration, right?

17 THE WITNESS: Yes. I'm applying the
18 legal standard as it was explained to me by
19 counsel.

20 BY MR. LESKO:

21 Q Okay. When you refer to structure in
22 your declaration, you're referring to structure
23 in a legal sense. Is that your testimony?

24 A Yes. Yes. I mean, as I said, that's
25 not a term that an engineer would normally use in

1 dealing with a microprocessor or any other
2 electronic system. But it does have a specific
3 legal meaning, as it's been explained to me, and
4 that's what I've applied in my opinions.

5 Q Is a microprocessor part of an
6 electronic system?

7 A It could be, along with other parts. I
8 mean, a microprocessor alone doesn't, typically,
9 do anything.

10 Q Is there a difference between a
11 microprocessor and a microcontroller?

12 A Again, it depends on context and
13 timeframe.

14 Q Let's say we're talking 2005 October.
15 What's the difference between a microprocessor
16 and a microcontroller?

17 A Again, it would depend on context. But
18 oftentimes, in that timeframe, a microprocessor
19 referred to what we would typically call a CPU, a
20 single compute engine; where most commonly, in
21 that timeframe, a microcontroller also included
22 some input/output functionality and some memory
23 integrated onto the same chip.

24 Q So, at that timeframe, a microcontroller
25 has more elements integrated into it than a

1 microprocessor?

2 A Again, depends on context, but in what I
3 think is probably the most common usage at the
4 time, that would be true.

5 Q What are, like, the basic elements of a
6 microprocessor in that timeframe, October of
7 2005?

8 A Again, it would depend on context and
9 there would be a lot of variability. There are
10 many different kinds of microprocessors in that
11 timeframe, but, might include a program counter
12 and arithmetic logic unit, a status register.
13 But, again, a lot of variation. There are a lot
14 of different approaches that could be used.
15 There's no single answer to that question.

16 Q So the word micro in the term
17 microprocessor or microcontroller, what is that
18 referring to? Why does it say micro?

19 A Again, that depends on timeframe and
20 context. But, initially, it was introduced in
21 the 1980s as a way to differentiate computers
22 that might be the size of a refrigerator from
23 computers where the primary computing elements
24 were on a single piece of silicon.

25 Q So the word micro, just to clarify, is

1 that usually the physical size of the item, the
2 microcontroller or the microprocessor? Are you
3 talking about physically how large it is?

4 A Again, it depends on context and
5 timeframe, but, in many cases, it would refer to
6 the physical size. By 2005, it had become almost
7 irrelevant because other kinds of processors
8 were, predominantly, obsolete.

9 Q So microprocessors and microcontrollers,
10 as of 2005, sort of dominated the market for a
11 CPU or a computing device?

12 MS. WEISKOPF: Object to form, vague.

13 THE WITNESS: In general, although there
14 were hundreds of different kinds of
15 microprocessors and microcontrollers at the time,
16 and they often had quite different
17 characteristics.

18 BY MR. LESKO:

19 Q Would you say that a microprocessor
20 refers to a class of electronics devices?

21 A It depends what you mean by a class of
22 electronic devices. I mean, you can build a
23 class out of anything, abstractly.
24 Microprocessors were used for many, many
25 different things in the 2005 timeframe, and they

1 weren't necessarily interchangeable or suitable
2 for other things.

3 Some microprocessors would be suitable
4 for supercomputing, others would be suitable for
5 a smoke detector. They would differ in key
6 characteristics by factors of tens of thousands.

7 They would not be suitable replacements for each
8 other. They wouldn't necessarily contain the
9 same components. They wouldn't contain the same
10 components. They wouldn't -- the components that
11 they did have in common wouldn't be connected
12 together in the same way, and wouldn't be
13 quantitatively similar.

14 So, if you make a class big enough --
15 objects as a class, physical objects, right, is a
16 class. But it really just depends on how big you
17 make the grouping as to whether or not it would
18 be reasonable to make microprocessors into a
19 class.

20 Q Well, is there a commonality -- if you
21 use the term microprocessor, let's say, in
22 October 2005, would a skilled artisan -- would
23 that signal a specific type of item to a skilled
24 artisan?

25 A I would say, no, not a specific type.

1 Because if you told me to go get a microprocessor
2 and didn't give me a great deal more detail, I
3 would not be able to go get one that was suitable
4 for your needs.

5 Q So if I had some detail about the
6 operations that the microprocessor was to
7 perform, could you find a suitable
8 microprocessor? Could a skilled artisan find one
9 in October of 2005?

10 MS. WEISKOPF: Object to form.

11 THE WITNESS: If you had sufficient
12 detail, then they probably could, but that could
13 be quite a bit of detail depending on the
14 context.

15 MR. LESKO: Okay. But usually, if I
16 said these are the operations I need and I need a
17 microprocessor for it, somebody skilled in the
18 art in October of 2005 would understand what
19 they're looking for, at least. Is that a fair
20 statement?

21 MS. WEISKOPF: Object to form, vague.

22 THE WITNESS: No, it would depend on
23 whether or not you had provided sufficient
24 detail. If you told me that you needed a
25 microprocessor that could calculate and

1 communicate, that would be not enough for me to
2 figure out what you were looking for. If you
3 told me a great deal more detail, then it might
4 be.

5 MR. LESKO: Another way to phrase it is
6 what -- would I know -- would a skilled artisan
7 in 2005, October 2005 at least know the group of
8 items to pull from if I said give me a
9 microprocessor to perform these operations? So
10 would they be looking at, for example, memories?

11 THE WITNESS: They might be looking at
12 things that included memories. I mean, yes,
13 there would be some boundary, but that boundary
14 would be huge, and it would include a wide
15 variety of things that are not substitutable for
16 each other and that are not equivalent to each
17 other. If you draw a big enough box, it can
18 incorporate everything. If you draw a slightly
19 smaller box, it can incorporate almost
20 everything.

21 But you need to really be relatively
22 specific in describing what the expectations are
23 of a microprocessor, and how it's to be used in
24 some reasonable detail in order for a person of
25 ordinary skill to understand what you're talking

1 about. I mean, clearly if you just told me you
2 need electronics, that would include some things
3 and not other things, but it wouldn't give me
4 enough guidance to be able to bring you
5 electronics in a box that were suitable for your
6 needs.

7 BY MR. LESKO:

8 Q But in reviewing your CV, just going to
9 change topics here. You're a named inventor on a
10 number of U.S. patents and patents abroad, is
11 that correct?

12 A Yes.

13 Q Approximately how many patents have you
14 been a named inventor on?

15 A I believe 90-some.

16 Q Okay. And in the course of your
17 involvement in -- let me withdraw that question,
18 sorry. So are you aware of something called the
19 duty of disclosure, candor, and good faith at the
20 U.S. Patent Office?

21 A I am aware of it. I am not a patent
22 attorney or a patent examiner or a -- but it has
23 been explained to me in my role as an inventor.

24 Q Okay. And what's your understanding of
25 what that means?

1 A It's been some time. I haven't filed a
2 patent in many years, but, in general, my
3 understanding is that you are expected to
4 disclose your invention in sufficient detail that
5 a person -- that enables a person of ordinary
6 skill in the art to practice the invention, that
7 you must provide sufficient detail to show that
8 you were in possession of the invention at the
9 time of filing. And you need to disclose any
10 relevant prior art that you're aware of.

11 Q Okay, and that applies to inventors. Is
12 that right?

13 A That's the way I form my understanding.
14 Yes.

15 Q Okay. So I'm reading from the USPTO
16 rules. It says each individual associated with
17 the filing and prosecution of a patent
18 application has a duty of candor and good faith
19 in dealing with the office, which includes the
20 duty to disclose to the office all information
21 known to that individual to be material to
22 patentability as defined in this section. So
23 does that generally reflects your understanding
24 of your duty as an inventor to the USPTO?

25 A Generally, it does. Again, I'm not

1 going to give you a legal opinion on it, but
2 that's my general understanding.

3 Q All right. So and I understand you're
4 not a lawyer giving legal opinions but part of
5 that you would agree is if you're an inventor
6 involved in a filing with the Patent Office, you
7 should be honest with the Patent Office, right?

8 A Yes. In fact, more than that, honest
9 and complete.

10 Q And I know you said this was a long time
11 ago, but for writing your patent applications,
12 was it your practice to write any portions of the
13 specifications in the patent applications that
14 you submitted?

15 MS. WEISKOPF: Object to form. This is
16 getting pretty far afield.

17 THE WITNESS: I also want to be careful
18 that I don't -- I don't own any of these patents.

19 I wasn't paying the attorneys. I want to be
20 careful that I don't go past privilege here. I
21 produced inventions in a number of contexts. I
22 don't believe I was ever the assignee. I would
23 write an invention disclosure. I would provide
24 that to a patent attorney or a patent agent.
25 Depending on the circumstances, that patent

1 attorney or patent agent may copy portions from
2 my invention disclosure verbatim into the patent
3 application, or they may paraphrase it in other
4 ways.

5 I would also often have verbal
6 discussions with patent prosecutors to expound on
7 or explain portions of my invention disclosure.
8 Those would sometimes be turned into text by the
9 patent prosecutor. And then I would always read
10 and approve a patent application prior to its
11 filing to ensure that it accurately reflected
12 what I had invented, and that it did not have any
13 misrepresentations, and that, as far as I could
14 tell at the time, the explanations were
15 sufficient.

16 MR. LESKO: So if you noticed any errors
17 in the patents that you were an inventor on, you
18 would correct them or ask the prosecuting
19 attorney to correct those errors?

20 THE WITNESS: Prior to filing. I, in
21 general have not had any interaction post-filing
22 with any of my patent applications.

23 BY MR. LESKO:

24 Q All right, thanks for the clarification.

25 And that's what I meant. So in preparing the

1 applications before you file them, it sounded
2 like you would review them. And if you noticed
3 errors or omissions, you would raise that with
4 the prosecuting attorney.

5 A Yes.

6 Q I'm looking at -- I'm gonna put in the
7 folder Plaintiff's Exhibit 6.

8 (Whereupon, the above-referred to
9 document was marked as Plaintiff's Exhibit No. 6
10 for identification.)

11 A Okay.

12 Q Hang on one second here. I'm sorry, I
13 think I marked the wrong exhibit here. I'm going
14 to mark a Plaintiff's Exhibit 7 here and put in
15 the Box. You can close Plaintiff's Exhibit 6.
16 My apologies. Okay, so Plaintiff's Exhibit 7
17 should now be there. If you could open it,
18 please.

19 (Whereupon, the above-referred to
20 document was marked as Plaintiff's Exhibit No. 7
21 for identification.)

22 A Yes.

23 Q Okay. You see on the front there, your
24 name is on Page 1 as an inventor. It says
25 inventors Andrew L. Wolfe, do you see that?

1 A Yes.

2 Q Okay. So is this one of your patents,
3 Plaintiff's Exhibit 7?

4 A It's one where I'm listed as a named
5 inventor.

6 Q Okay. Could you scroll to Page 4 of
7 Plaintiff's Exhibit 7?

8 A Okay.

9 Q So there's a Figure 2 there on Page 4 of
10 this document. Do you see it?

11 A Yes.

12 Q Okay. So if you look at Item 206 in
13 Figure 2, it says memory. Do you see that?

14 A Yes.

15 Q Based on your understanding of that
16 term, is that memory a physical item?

17 A I don't think I've read this patent in
18 almost 20 years. I'm not going to start giving
19 you definitions based on one box in a picture.

20 Q Are you aware of a situation where a
21 memory is something that isn't, you know, a
22 physical location somewhere or physical storage?

23 A Depends on context. At some level,
24 memory is always physical storage, but when we
25 refer to it, it could be a virtual memory, it

1 could be an emulated memory. It needs to be
2 considered in context before you can determine
3 what the particular words are referring to.

4 Q Well, what about input switches? See
5 item number 203. Would that be physical input
6 switches or is that -- can that mean something
7 else?

8 A Again, I haven't read this patent in
9 almost 20 years. I -- it would depend on what
10 the description is in the text. I would
11 certainly think that it could be a physical input
12 switch.

13 Q What other type of input switch is
14 there?

15 A You can have software switches. But
16 again, I don't recall what was described in this
17 particular patent.

18 Q If you look at Item 224 there's a
19 speaker. Item 222 there's a monitor. Item 220
20 there's a TV. Do those appear to be physical
21 items just based on what they say, TV, monitor,
22 speaker?

23 A Just based on Figure 2 alone, they do
24 appear to be physical objects.

25 Q You've got Item 208 in the center.

1 That's the controller. You see that?

2 A It is a controller. Yes.

3 Q Now I notice all of the items in this
4 figure are in boxes. Do you know why?

5 A I do not.

6 Q Does this look like a block diagram to
7 you?

8 A It generally looks like one.

9 Q In a block diagram, are the items
10 typically placed in boxes?

11 A That would be typical.

12 Q Would that be a common format in
13 patents, sometimes you put the items in boxes in
14 a block diagram?

15 MS. WEISKOPF: Object to form, vague.

16 THE WITNESS: That's not unusual. In a
17 well-written patent, there would be additional
18 text to describe what each box represents.

19 MR. LESKO: But sometimes, even if
20 there's text describing what each box represents,
21 sometimes there's high level block diagrams in a
22 patent in your experience, is that right?

23 THE WITNESS: Sometimes patents include
24 high level block diagrams.

25 MR. LESKO: And so even if there's a

1 structure or even if there's a physical item in
2 the block diagram, it's not always described in
3 the diagram itself. Is that right?

4 MS. WEISKOPF: Object to form.

5 THE WITNESS: I'm certainly aware of
6 patents where there's a physical item in a block
7 diagram, and the physical item is not described
8 in the diagram itself.

9 MR. LESKO: If you look at -- if you
10 could scroll down please, Dr. Wolfe, to Column 15
11 of this patent, Lines -- Line 36.

12 THE WITNESS: Okay.

13 BY MR. LESKO:

14 Q Can you read the sentence that begins at
15 Line 36?

16 A In addition, use of the term means in
17 any claim is intended to invoke 35 U.S.C.
18 Section 112, Paragraph 6, and any claim without
19 the word means is not so intended.

20 Q What's your understanding of that
21 statement? What does it mean?

22 MS. WEISKOPF: Object to form; it's a
23 legal issue.

24 THE WITNESS: I didn't write that;
25 attorney did many years after I had provided my

1 invention disclosure, and it's also my
2 understanding that the law has changed over time
3 with respect to 35 U.S.C. 112, Paragraph 6. So,
4 as an inventor on this patent, I don't have any
5 understanding of whether or not that phrase is
6 operable or -- and to me, it means exactly what
7 it says.

8 MR. LESKO: You received some
9 instruction on the law about intrinsic evidence
10 in preparing your declaration. Is that right?

11 THE WITNESS: Yes.

12 MR. LESKO: Okay, so would you agree
13 that this sentence at 15, 36 through 38 that you
14 just read to me, is that part of the intrinsic
15 record for this patent, Exhibit -- Plaintiff's
16 Exhibit 7?

17 MS. WEISKOPF: Object to form.

18 THE WITNESS: I don't know; that's
19 really a legal issue. I don't know whether or
20 not legal statements made in patents are part of
21 the intrinsic record or not.

22 MR. LESKO: Is the specification part of
23 the intrinsic record of a patent?

24 THE WITNESS: It generally is, yes.

25 BY MR. LESKO:

1 Q Is this statement included in the
2 specification of this patent, Plaintiff's Exhibit
3 7?

4 A Again, I can't give you a legal opinion,
5 but it appears to be on its face. Yes.

6 Q So on its face, is this statement part
7 of the intrinsic record?

8 A Again, it appears to be, but I can't
9 give you a legal opinion. I mean, in general, I
10 don't think you're allowed to redefine the law in
11 the specification. So to the extent that it
12 expresses the patentee's intent at the time, I
13 suppose it is.

14 Q Well if I were asking you to review this
15 patent and construe these claims or decide
16 whether they're, you know, means plus function,
17 would you -- would that sentence seem relevant to
18 you or not?

19 A Again, I'm only implying the law as I've
20 been instructed, but my understanding is that
21 under the current standards for 112 6, intent is
22 not a factor that I would consider.

23 Q So because it, in your view, expresses
24 intent, you would just ignore it?

25 MS. WEISKOPF: Object to form,

1 mischaracterizes testimony.

2 THE WITNESS: It's not one of the
3 factors that under the explanation that I've been
4 given as to the current law with respect to means
5 plus function elements, intent is not one of the
6 factors that would be considered.

7 MR. LESKO: All right. I'm marking some
8 other exhibits here. Just give me one second.
9 Okay. If you could, I just uploaded Plaintiff's
10 Exhibit 8. Could you please open that, Dr.
11 Wolfe? And once you have it open, can you sort
12 of skim through it and tell me, do you recognize
13 this document?

14 (Whereupon, the above-referred to
15 document was marked as Plaintiff's Exhibit No. 8
16 for identification.)

17 THE WITNESS: I looked at it. There
18 were a lot of very similar documents in the file
19 history, so I don't recognize whether or not this
20 is a particular one or not.

21 BY MR. LESKO:

22 Q Okay. Let's separately open Plaintiff's
23 Exhibit 1, and we'll go to Page -- PDF Page 16.

24 A Okay.

25 Q So Paragraph 46 says the application

1 leading to the '761 patent was filed on November
2 24th, 2015. On the same day, the claims were
3 amended as follows. And then there are some
4 claims provided. It looks like it was pulled
5 from the history. And then there's a Paragraph
6 47 that has another excerpt from the remarks
7 underneath it. And then that sort of ends on PDF
8 Page 36. Do you see all that?

9 A Yes.

10 Q Okay, so now let's go back to
11 Plaintiff's Exhibit 8. There's some amendments
12 to the claims on Page 4 through 9. There's some
13 -- and then on Pages 12 through 25, there's some
14 remarks. And maybe another way -- easier way to
15 do this, there's a -- also a date on Page 11 that
16 says November 24th, 2015. So looking at all
17 that, does that correspond to materials that are
18 cited on Page -- Pages 14 through 34 of your
19 declaration, Plaintiff's Exhibit 1?

20 MS. WEISKOPF: Object to form.

21 THE WITNESS: It appears to at the
22 moment. I would have to compare them very, very
23 carefully to know for sure.

24 MR. LESKO: Okay. Well, how about this?

25 I'll represent to you as well that this is the

1 same office action that's -- you pulled excerpts
2 from it. Not office action, I'm sorry,
3 submission that you pulled excerpts from in your
4 declaration on those pages. So that's true,
5 you've seen this before, right? You've probably
6 seen the submission because you reviewed it and
7 then included it in your declaration?

8 THE WITNESS: Yes. If that's the same
9 material that I included in my declaration then I
10 have reviewed it.

11 BY MR. LESKO:

12 Q Okay. And so if you look at PDF Page
13 10, it says -- there's a paragraph third to last
14 that says in addition. Can you read that
15 paragraph out loud for the record?

16 A Sure. In addition, applicant has taken
17 care to prepare the claims in a manner that does
18 not fall within 35 U.S.C. Section 112, Paragraph
19 6. Specifically, applicant has undertaken to
20 draft the claims in a manner that recites
21 structure, material, or acts in support of the
22 various operations. Applicant requests that the
23 examiner inform applicant if he believes that any
24 claim falls within 35 U.S.C. Section 112,
25 Paragraph 6, so that appropriate amendments can

1 be made.

2 Q Do you recall during your review seeing
3 this statement in the prosecution history that
4 you reviewed?

5 A Yes.

6 Q Okay. So you've seen it before. Do you
7 recall in your expert declaration, Plaintiff's
8 Exhibit 1, did you comment on this statement?

9 A I don't believe so. As I mentioned
10 before, the standard that I applied did not
11 include intent. And also the claims that are
12 being referred to here are different claims than
13 the ones I opined on.

14 Q So you're aware of this statement and
15 you -- but you didn't -- you had a reason why you
16 believed there was no need to comment on it. Is
17 that fair?

18 A Yes.

19 Q Now, what about the examiner's
20 understanding of the claims? Would that be
21 relevant to your analysis of claim construction?

22 A Might be something that I consider, but
23 again, my understanding of the standard is not
24 that the examiner gets to decide at this point in
25 time whether or not the claims are covered by

1 Section 112, Paragraph 6, that -- that we need to
2 apply the standard to the claim language and to
3 the specification as it's written.

4 Q Well, generally speaking, would you say
5 that comments by the applicant or comments by the
6 examiner form part of the intrinsic record in
7 reviewing claim language?

8 A They do, but they need to be considered
9 appropriately with respect to the context and
10 content of the comments.

11 Q So there are instances in your
12 declaration where you quote, for example,
13 comments made by the applicant in this case, CEV,
14 during prosecution. Is that right?

15 A Yes.

16 Q And that's because you believed they
17 were relevant to the intrinsic evidence for how
18 they look at the claims. Is that an accurate
19 statement?

20 A In those cases, yes.

21 Q But in this case, the statement that
22 these are not prepared in 112, 6 and the request
23 for the examiner to notify applicant if he
24 disagrees, that wasn't relevant in your view?

25 A It wasn't necessary to comment on it in

1 order to provide the opinions in my declaration.

2 It doesn't change my opinion as to whether or
3 not these particular claims are covered by 112,
4 6. It doesn't, in fact, create structure or
5 disclosure of structure in the specification. It
6 doesn't link any disclosures of structure to the
7 claimed functions. So there was an overwhelming
8 number of factors to help me reach the conclusion
9 that these were -- the elements that I opined on
10 were 112, 6 elements, and that they were not
11 supported in the specification in terms of
12 structure, whether or not the applicant had
13 suggested that it was their intent in these other
14 claims to do it that way, or whether or not there
15 had been a request to the examiner.

16 Q In your review of the file history, did
17 you see the examiner flag anything as means plus
18 function in any of the office actions for -- this
19 is -- I'm sorry, this is the application
20 corresponding to the '761 patent. So let me
21 start my question again.

22 In your review of the '761 patent file
23 history, did you ever see any instances where the
24 examiner told CEV, the applicant, that he's
25 construing the claims as means plus function?

1 A I don't recall seeing him comment on
2 that issue one way or the other. And of course,
3 even if he had, he would be using a broadest
4 reasonable construction standard and not the
5 standard that we're using today.

6 Q What's the difference in those
7 standards?

8 A Again, I can't give you a legal opinion,
9 but a broadest reasonable construction standard
10 is generally broader than the plain meaning
11 standard that we that we are using in court or
12 the ordinary and customary meaning, I think, is
13 the -- in view of the specification, I think is
14 the language. Again, I don't remember the exact
15 legal language, but I think it's in my report.

16 Q Well, it's interesting you raise it. So
17 how does that affect the means test function
18 determination here if we were looking at this
19 from a broadest reasonable construction?

20 A I don't know if it does or not because I
21 haven't looked at it from a broadest reasonable
22 construction. But if there had been any comments
23 from the examiner, which there weren't, I would
24 have had to take into account that he may have
25 been applying a different claim construction

1 standard.

2 Q If you could, Dr. Wolfe, please pull up
3 Plaintiff's Exhibit 9.

4 (Whereupon, the above-referred to
5 document was marked as Plaintiff's Exhibit No. 9
6 for identification.)

7 A I don't have a Plaintiff's Exhibit 9.
8 Was that recently put in the folder?

9 Q Can you try refreshing the folder,
10 please? It should be in there, but, you know,
11 sometimes there's technical issues.

12 A Okay, I have it now.

13 Q Thanks. Okay, so here in the
14 Plaintiff's Exhibit 9 -- well, first of all, do
15 you recognize this document?

16 A It appears to be a portion of the file
17 history. But again they are very similar. I
18 can't tell you exactly which portion it is
19 without comparing them page by page.

20 Q So if you go to Page 9 of Plaintiff's
21 Exhibit 9, there's a date October 25th, 2019. Do
22 you see that?

23 A I do.

24 Q Okay. So now if you go back to
25 Plaintiff's Exhibit 1 and PDF Page 50 -- I'm

1 sorry, 60 of that document, there is a reference
2 to the same date, October 25th, 2019. And then
3 there's an excerpt from the file history that
4 goes from Page 60 to Page 63 of Plaintiff's
5 Exhibit 1. Do you see that?

6 A Yes.

7 Q Okay. And then actually on -- if you
8 could scroll up to Page 58 of the PDF. It says
9 in your Paragraph 54 -- I'm talking about Page 58
10 of Plaintiff's Exhibit 1. It says in Paragraph
11 54 on Page 58 of Plaintiff's Exhibit 1, the
12 application leading to the '472 patent was filed
13 on October 25th, 2019. The claims were amended
14 the same day to the following, and then there's a
15 footnote, Footnote 2. Do you see that?

16 A I don't see a footnote. This is on Page
17 58 of the document?

18 Q PDF, Page 58.

19 A Oh, I'm sorry.

20 Q That's okay. I know it's confusing when
21 the page numbering differs. So just a -- yeah,
22 58 of the PDF, not your declaration page number.

23 A Okay. I do see that.

24 (Simultaneous speaking.)

25 Q There's a Footnote 2 there, and it says

1 original claims 21 through 22 issued as claims 1
2 to 2 of the '472 patent. Original claims 25 to
3 26 issued as Claims 5 to 6 of the '472 patent.
4 Do you see the footnote?

5 A Yes.

6 Q Okay. So here there's a filing on
7 October -- I'm referring to Plaintiff's Exhibit 1
8 now. It refers to a filing on October 25th,
9 2019, where the claims that issued of the '472
10 patent were actually filed, and then if you
11 continue through Page 61 -- I'm sorry, Page --
12 PDF Page 63, there's the remarks that were filed
13 with those claims. Do you agree with me?

14 MS. WEISKOPF: Objection to form.

15 THE WITNESS: I have included copies of
16 the claims that were filed and some of the
17 remarks that were filed with the claims.

18 MR. LESKO: Okay. And if you look at
19 Plaintiff's Exhibit 9, Pages 4 through 6, those
20 are the -- I'll represent to you those are the
21 same claims that are copied into your declaration
22 that we just discussed. And those remarks on
23 Pages 7 through 9 are the same that are copied
24 into your declaration that we just discussed.

25 THE WITNESS: Yes.

1 BY MR. LESKO:

2 Q Okay. So if that's true, then these are
3 -- this is the filing of the claims that led to
4 the same claims that issued in the '472 patent.
5 Do you agree?

6 A It appears that way to me.

7 Q Okay. With this filing -- and frankly,
8 maybe it's easier just go to your -- go back to
9 Plaintiff's Exhibit 1, I'm sorry. On Page 63 --
10 I'm sorry, on Page -- let me withdraw my question
11 and start again. Plaintiff's Exhibit 1, which is
12 your declaration, on Page 62, there's a final
13 paragraph there and then there's a sentence that
14 starts in addition. Can you read that paragraph
15 at the bottom of PDF Page 62 of Plaintiff's
16 Exhibit 1?

17 A Applicant believes that no new matter
18 has been added. In addition, applicant has taken
19 care to prepare the claims in a manner that does
20 not fall within 35 U.S.C. Section 112, Paragraph
21 6. Specifically, applicant has undertaken to
22 draft the claims in a manner that recites
23 structure, material, or acts in support of the
24 various operations. Applicant requests that the
25 examiner inform applicant if he believes that any

1 claim falls within 35 U.S.C. Section 112,
2 Paragraph 6, so that appropriate amendments can
3 be made.

4 Q All right, so based on your declaration,
5 Plaintiff's Exhibit 1, that statement you just
6 read to me was provided with the filing of the
7 claims that issued in the '472 patent. Would you
8 agree?

9 A The statement was made by the applicant.

10 Q And when it was made, the claims that
11 were pending are those that issued in the '472
12 patent. Do you agree with that as well?

13 A They were. I disagree with the
14 statements made by the applicant, but I agree
15 that the applicant made those statements at the
16 time that those claims were presented.

17 Q Okay. And, again, in the '472 patent
18 file history, did you see any instance where the
19 examiner flagged any claim element as 35 U.S.C.
20 112 Paragraph 6, means plus function?

21 A I didn't see him comment either way. I
22 think the examiner did a poor job in -- in
23 general here. I think that if the examiner had
24 looked, they would have seen that new matter was
25 clearly added to this application, and if they

1 had examined the claims carefully, they would
2 have seen that they were within 35 U.S.C. 112,
3 Paragraph 6. I didn't see any indication in the
4 file history that the examiner had considered the
5 issues in this paragraph at all.

6 Q Did you see any indication in the file
7 history that the examiner believed any claim was
8 112, Paragraph 6. Yes or no?

9 A As I said, I didn't see any indication
10 that the examiner had considered the issue one
11 way or the other at all.

12 Q I'll ask you again. Did you see any
13 instance in the file history where the examiner
14 flagged any claim as being subject to 112
15 Paragraph 6 for the '472 patent?

16 MS. WEISKOPF: Objection, asked and
17 answered.

18 THE WITNESS: I did not see any
19 indication in the file history that the examiner
20 had considered the question of 35 U.S.C. 112,
21 Paragraph 6, at all.

22 MR. LESKO: Did you see any 112
23 rejections in the file history of the '472
24 patent?

25 MS. WEISKOPF: Objection, asked and

1 answered.

2 MR. LESKO: No, different question. Did
3 you see any 112 rejections in the file history of
4 the '472 patent, sir?

5 MS. WEISKOPF: Same objection.

6 THE WITNESS: Again, I don't want to
7 give you a legal opinion here. I did see the
8 examiner object that certain things were not
9 supported by the specification. That was always
10 part of a list of reasons for rejecting claims.
11 So I haven't really considered whether or not
12 that was the only reason for a rejection or one
13 among many reasons for rejection.

14 MR. LESKO: Did you see any rejections
15 that cited -- let's just put it this way. I'm
16 not asking for a legal opinion. Did you see any
17 rejections in the file history of the '472 patent
18 that referred to Section 112, 35 U.S.C. Section
19 112?

20 THE WITNESS: I don't recall seeing that
21 by name, but as I said, I recall comments through
22 the complete history of this family of patents in
23 which claims were requested, and the examiner
24 responded by saying that certain elements of the
25 claims were not supported in the specification.

1 That in my mind that is within paragraph -- or
2 within Section 112, but I don't think that they
3 were phrased that way by the examiner.

4 BY MR. LESKO:

5 Q Okay. So let's just go to Page 175 of
6 Exhibit -- Plaintiff's Exhibit 1 which is your
7 declaration. PDF Page 175. And there's a
8 paragraph there, Paragraph 19 says -- 92 that
9 says specifically, the examiner rejected the
10 claims under Section 112. Do you see that?

11 A Yes.

12 Q So do you -- based on that statement,
13 now, maybe this helps you remember, did you see
14 in the file history of the '472 patent that the
15 examiner rejected the claims that eventually
16 issued in the '472 patent under Section 112 at
17 one point in time?

18 A This was one of the rejections I was
19 referring to before, where it was my
20 understanding in reading the examiner's remarks
21 that he did not believe that there was sufficient
22 support and specification for what at the time
23 was a claim element.

24 Q Okay. And so you would agree the
25 examiner considered 112 issues in examining the

1 U.S. Patent -- the '472 patent?

2 MS. WEISKOPF: Object to form, vague.

3 THE WITNESS: In at least this one case
4 he did consider a 112 issue.

5 MR. LESKO: But there was no means plus
6 function assertion by the examiner that you're
7 aware of?

8 THE WITNESS: I'm not aware of any
9 discussion one way or the other about means plus
10 function terms in the claims for the '472 in the
11 examiner's file history.

12 BY MR. LESKO:

13 Q Okay. Sorry, I'm marking another
14 exhibit here. Okay. You should see in the
15 folder now Plaintiff's Exhibit 10.

16 (Whereupon, the above-referred to
17 document was marked as Plaintiff's Exhibit No. 10
18 for identification.)

19 A Okay.

20 Q Were you able to open that, Dr. Wolfe?

21 A Yes.

22 Q Okay, great. Do you recognize this
23 document?

24 A This is a patent where I'm named
25 inventor.

1 Q Okay. And in this case, you're the only
2 named inventor. Is that right?

3 A Correct.

4 Q Okay. Can you scroll down to Page 7 of
5 this document, and then this is actually on Pages
6 7 and 8. Can you take a look at Figures 7B and
7 7C. Take your time there. Read those over to
8 yourself, please.

9 A Okay.

10 Q Okay. Can you describe what's there in
11 Figure 7B and 7C?

12 A I think, again, I haven't looked at this
13 patent in 15 years or so, but just quickly
14 looking at just those pages, it appears to be an
15 exemplary algorithm for performing some of the
16 functions disclosed in the patent specification.

17 Q Would you agree also that it's an
18 example of program code as well?

19 A It's not program code. It's perhaps
20 pseudocode. It's intended to express an
21 algorithm or a set of steps. I guess it is
22 described as exemplary program code, but it's not
23 actual program code. It's not in an actual
24 programming language. It's exemplary.

25 Q Okay. But a programmer reading this

1 would understand how to write this type of
2 program, do you think?

3 A This would disclose an algorithm to a
4 programmer that they could then implement in a
5 system.

6 Q So the date on this patent is 2014. I
7 understand there's some differences here, but if
8 we're talking October of 2005 instead, let's just
9 hypothetically say this same code was in this
10 patent and the patent was dated October of 2005.

11 Would you still agree that this discloses an
12 algorithm for a programmer?

13 MS. WEISKOPF: Objection, vague.

14 THE WITNESS: Well, in the first place,
15 I think that the date of relevance would be March
16 9th, 2009 when this was filed, not when it was
17 issued. But this is -- in 2005, this would have
18 been a disclosure of an algorithm. If one were
19 to evaluate this patent, they would still have to
20 determine whether it's a sufficient disclosure,
21 whether it discloses enough of an algorithm to
22 support the claims, whether or not it's
23 sufficient to enable a person of ordinary skill
24 to implement. I haven't done that level of a
25 detailed analysis.

1 MR. LESKO: Right. I just would -- I
2 guess I would say this type of code would have
3 been available in 2005 as well? Is there any
4 difference between this code and -- you know,
5 this algorithm in 2005 versus 2009?

6 THE WITNESS: Yeah, I hadn't invented
7 this algorithm in 2005. That's why I got an
8 issued patent later for inventing it.

9 BY MR. LESKO:

10 Q How about the format of the algorithm,
11 though, this if, you know, parentheses, traffic
12 lane equals equals non HOV, and then --

13 (Simultaneous speaking.)

14 Q -- under that. Is that format, you
15 know, a new format in 2009?

16 A No, no, I mean, the words, the
17 punctuation were known, but the content of the
18 algorithm, the sequence of steps, the specificity
19 of the steps. That's the algorithm; that's the
20 inventive step. And, again, I'm not making a
21 judgment here today whether or not this is
22 sufficient for the claims in this patent. But
23 just the form of an algorithm is never sufficient
24 to express an algorithm. You need its actual
25 content as well.

1 Q Right. Okay. So this -- let me just
2 ask you, not the specifics of this particular
3 algorithm. Is there a name for this format of an
4 algorithm? These if statements, else, if
5 statements, is there a common name that maybe a
6 skilled artisan would use to describe those types
7 of statements?

8 MS. WEISKOPF: Object to form.

9 THE WITNESS: If someone described this
10 as pseudocode, P-S-E-U-D-O code, I think a
11 person of ordinary skill would generally
12 understand what they're talking about. But,
13 again, that's like saying a paragraph is made of
14 words. It doesn't tell you what that paragraph
15 expresses.

16 MR. LESKO: Well, like an if statement -
17 - let me ask you first, maybe I'll establish a
18 little bit of foundation here. Do you have some
19 understanding of coding?

20 THE WITNESS: I have a very detailed
21 understanding of coding.

22 BY MR. LESKO:

23 Q You have a very detailed understanding
24 of coding. Okay, great. If -- this if
25 statement, right, and then there's some lines

1 underneath it. Based on your detailed of
2 understanding of coding, like what type of
3 statement is that to a coder?

4 A It is a conditional statement. But,
5 again, that's pretty meaningless in terms of
6 understanding the content. It's like saying that
7 a paragraph includes verbs and nouns. It doesn't
8 tell you what the paragraph's expressing. It's
9 the actual words, the order that they're used,
10 and the specific way that they're formatted that
11 would express the algorithm.

12 Q So if else or maybe if then, you agree
13 those are called conditional statements in
14 programming?

15 A It depends how they're used. But that
16 that would be common, yes.

17 Q Why are they called conditional
18 statements?

19 A Because under some conditions you would
20 do one thing and under other -- sorry. Under
21 some conditions you would do one thing, and under
22 other conditions you would do something else, as
23 a general concept.

24 Q And that general concept, just focus on
25 that. I'm on the same page as you. That general

1 concept did exist as of 2005 in coding. Do you
2 agree?

3 MS. WEISKOPF: Objection, vague.

4 THE WITNESS: The general concept of
5 using conditionals existed. But, again, that's
6 like saying the general concept of using verbs in
7 sentences. It doesn't tell you anything about
8 what's actually being expressed.

9 MR. LESKO: Yeah, I understand you need
10 to know what the conditions are, but conditional
11 programming was available and known to coders in
12 2005. Is that right?

13 THE WITNESS: It was available as a
14 building block. But, again, the mere existence
15 doesn't tell you anything. It depends on what
16 the conditions are, what happens under each
17 condition, and the overall structure of them.
18 Simply the existence of a condition or one simple
19 condition may not be enough to be an algorithm,
20 and may not be sufficient to describe any
21 particular function at all. You have to look at
22 the totality.

23 MR. LESKO: So if I wanted to program
24 something to happen based on a condition, could I
25 use this type of code --

1 MS. WEISKOPF: Objection, vague.

2 MR. LESKO: -- as of 2005?

3 THE WITNESS: If you had a complete and
4 sufficient description of the entirety of the
5 algorithm in order to perform a specific
6 function, then you could turn that into code.

7 MR. LESKO: Right. Well, like in this
8 instance, for example, if I want to check time of
9 query, I'm just looking at, you know, Exhibit --
10 what are we on, Exhibit 10. So in Exhibit 10 in
11 your patent there's an item that says check time
12 of query. So then it says if traffic lane equals
13 equals non-HOV, check time of query. So is non-
14 HOV the condition in that statement?

15 THE WITNESS: It is a partial condition
16 in a portion of the statement that describes a
17 portion of the algorithm. In and of itself, it's
18 not the algorithm. The algorithm is the entirety
19 of the description of functionality.

20 BY MR. LESKO:

21 Q I understand that. So traffic lane
22 equals equals non-HOV, is that a condition in
23 this code? Just one of the conditions in this
24 code, maybe that's a better way.

25 A That is one condition in this code. It

1 is a tiny part of this algorithm.

2 Q And what would be returned from, let's
3 say in the item -- and it doesn't really matter
4 what the specifics of this patent are, but let's
5 just use this as an example. Let's say traffic
6 lane equals equals non-HOV. That's the case.
7 What would be sort of returned in the code then?

8 A Well, again it depends on a lot of other
9 things, the entirety of the algorithm. But if
10 you look at it only at that locality then that
11 condition, traffic lane is equal to non-HOV,
12 would be either true or false.

13 Q Okay. And then if true what happens
14 according to this particular example?

15 A If true in this particular example, if
16 traffic lane was equal to non-HOV, you would
17 proceed through a sequence, in order, of eight
18 additional steps. Then you would test another
19 condition. Depending on the result of that
20 condition, you might perform a ninth step. If
21 that condition is not true, then you would check
22 another condition, in which case you might
23 perform an alternative ninth step. And in that
24 one particular case, which, again, is only a
25 portion of the algorithm, that's what you would

1 do. That portion is likely not sufficient enough
2 to support the claims in this patent. You
3 probably need the remainder of the algorithm as
4 well.

5 Q Okay. But it -- and that's helpful.
6 But generally speaking then an if statement, like
7 the first one here, that returns true or false,
8 and then what happens next depends on the
9 remainder of the code. Would you agree with
10 that?

11 MS. WEISKOPF: Objection, vague.

12 THE WITNESS: In a very general sense,
13 that's true. Again, you know, the remainder of
14 the code could express thousands or millions of
15 different algorithms. So you don't know much at
16 all from that kind of a high level description.

17 MR. LESKO: So if traffic lane equals
18 equals non-HOV here in Plaintiff's Exhibit 10
19 corresponds to a condition?

20 THE WITNESS: It is a test of a very
21 specific condition that is a small portion of an
22 algorithm.

23 BY MR. LESKO:

24 Q And the result of that test is true or
25 false here?

1 A I don't know that I'd --

2 MS. WEISKOPF: Objection --

3 (Simultaneous speaking.)

4 THE WITNESS: One result is that you
5 would evaluate that to be true or false, but in
6 context of the entire algorithm, the result is
7 that you proceed with another sequence of eight
8 to ten steps.

9 MR. LESKO: Right. So just looking at
10 that first step here on this page, the if
11 parentheses traffic lane equals equals non-HOV
12 end parenthesis. The result of that -- that
13 initial step is a true or false?

14 THE WITNESS: No, I think that would be
15 a mischaracterization. The result is that the
16 evaluation of true or false guides you to which
17 additional steps to take in the algorithm. So
18 you may go through one set of eight to ten steps,
19 or you may go through another set of eight to ten
20 steps, or you may go through a third one. So
21 there's lots of -- the algorithm is much more
22 complicated than that, and the results are much
23 more complicated than that. I don't think it's
24 fair to look at just a single value and call that
25 the result.

1 MR. LESKO: So the code here is a series
2 of true or falses and then other steps that are
3 taken as a result of the true or false, right?

4 MS. WEISKOPF: Objection,
5 mischaracterizes testimony.

6 THE WITNESS: The overall algorithm here
7 consists of evaluating a number of conditions.
8 Those evaluations will result in a value of true
9 or false, and then the algorithm describes a
10 sequence of eight to ten steps that would be
11 taken under each of at least four different --
12 well, maybe more, 4, 5, 6, 7, 8, 9, 10, 11, 12,
13 13, 14 different combinations of conditional
14 evaluations.

15 MR. LESKO: I'm marking Plaintiff's
16 Exhibit 11. Just bear with me. Okay. Dr.
17 Wolfe, can you pull up Plaintiff's Exhibit 11
18 please from --

19 (Whereupon, the above-referred to
20 document was marked as Plaintiff's Exhibit No. 11
21 for identification.)

22 THE WITNESS: Yes.

23 BY MR. LESKO:

24 Q So I'd ask, have you ever seen this
25 before?

1 A No, I am not familiar with JavaScript.

2 Q Okay. There's a statement here about
3 conditional statements, pages one and two. Can
4 you read pages one and two of Plaintiff's Exhibit
5 11 to yourself?

6 A Okay.

7 Q Do you agree generally with what stated
8 here on pages one and two that you just read to
9 yourself about conditional statements?

10 MS. WEISKOPF: Objection, vague.

11 THE WITNESS: I don't know. I don't
12 know JavaScript.

13 MS. WEISKOPF: Can I also just put on
14 the record that doesn't seem to be a date on this
15 document. Is that right?

16 THE WITNESS: The last page has a
17 copyright 1999 to 2025.

18 MR. LESKO: Yeah, I see that. Let's
19 just make this simpler. It says here, very often
20 when you write code, you want to perform
21 different actions for different decisions. You
22 can use conditional statements in your code to do
23 this. Do you agree with that statement, Dr.
24 Wolfe?

25 THE WITNESS: It depends what you're

1 coding language is. But in some coding languages
2 that is true sometimes.

3 BY MR. LESKO:

4 Q But setting aside the date, as of 2005,
5 can you use conditional statements in your code
6 to perform different actions for different
7 decisions?

8 A It depends on your development
9 environment, but in some you could. Again, that
10 doesn't tell you what conditions to test or what
11 steps to take. It doesn't provide you with an
12 algorithm, but as a very low underlying
13 technique, it was available.

14 Q Would it have been known to your sort of
15 definition of a skilled artisan in 2005 to use
16 conditional statements in programming for that
17 purpose?

18 A Yes. But again, it needs to be put into
19 context. It would be in the same way that it
20 would be known that a pen can be used for writing
21 poetry. It doesn't help you understand the
22 content of the poetry or what the poem should be.

23 Q So I'm marking here Plaintiff's Exhibit
24 12. And Dr. Wolfe, let me know if you're getting
25 hungry for lunch, too. I'm fine either way.

1 (Whereupon, the above-referred to
2 document was marked as Plaintiff's Exhibit No. 12
3 for identification.)

4 A Yeah, we should stop reasonably soon,
5 but I don't have 12 yet.

6 Q Okay. It should be there now, I think.

7 A Yep. It's downloading now.

8 Q Great. Thanks.

9 A Okay.

10 Q Okay. Do you recognize Plaintiff's
11 Exhibit 12?

12 A Yes. I haven't read it in more than a
13 decade, but that is a patent on which I am a
14 named inventor.

15 Q Okay. Column four of this patent --
16 actually, let's look at Columns two and three.
17 Columns two and three say, at the very bottom of
18 Column 2. The very last sentence, Column 2, Line
19 66, then it continues to Column 3, Line 4. Can
20 you read that to me?

21 A Sure. In some examples the data may be
22 sent from the backing storage to the cache in
23 encrypted form only if certain conditions are
24 met. For example, the data can be encrypted if
25 the data are stored in encrypted form in the

1 backing storage, or if there is some other
2 indication that the data should be encrypted
3 before being sent.

4 Q Thank you, Dr. Wolfe. If you look at
5 that, let's focus on Column 3, Lines 2 and 3 says
6 the data can be encrypted if the data are stored
7 in encrypted form in the backing storage. Does
8 that statement provide an algorithm for the data
9 can be encrypted?

10 A On its own, no, I don't think so.
11 There's much more detail in this patent. There's
12 flowcharts, and even then, I don't know for
13 certain whether or not there's sufficient
14 disclosure of an algorithm. I just haven't
15 considered --

16 Q I'm not asking about supportable claims.
17 Not at all. Let's just focus on the specific
18 issue. It said the data can be encrypted if data
19 is stored in encrypted form in the backing
20 storage. And I said, what's the algorithm using
21 just that excerpt for the data can be encrypted.

22 Is there an algorithm there for how the data can
23 be encrypted.

24 MS. WEISKOPF: Objection to form.

25 THE WITNESS: I don't know if there's a

1 legal rule here, but in my ordinary business as
2 an engineer, I can't imagine describing that as
3 an algorithm. It's simply a fragment of a
4 sentence describing one characteristic of a
5 system.

6 MR. LESKO: Well, for example, if you
7 read this, would you understand it to mean if
8 data equals encrypted form and backing storage,
9 data is encrypted. Can you read that or
10 understand that from reading that?

11 THE WITNESS: You could. Of course here
12 we have the advantage that there's a flowchart in
13 Figure 3 that actually puts forward the steps.
14 There's more description later. I wouldn't
15 normally take that sentence alone and consider it
16 to be an algorithm.

17 BY MR. LESKO:

18 Q If it's an algorithm just for data can
19 be encrypted, though it's a simple -- would you
20 say it's a simple algorithm for that specific
21 purpose?

22 A No, it doesn't tell you how to encrypt
23 anything.

24 Q Does it tell you the answer to encrypt,
25 yes or no?

1 A Under some circumstances it could, and
2 then you would have to consider whether or not
3 that's sufficient for any particular function.
4 But again, I would not normally call that an
5 algorithm in the way that I would normally define
6 an algorithm, but it would depend on the context.

7 Q Right. And the context is I want to
8 know the answer whether data should be encrypted.

9 And so I write a program that says, if
10 parentheses data equals encrypted form in the
11 backing storage closed parentheses. And go to
12 the next line. Data is encrypted. Just for
13 that, is that enough disclosure to understand
14 that's the corresponding program?

15 A I suppose that if you define your
16 function narrowly and trivially enough, it could
17 be. But certainly in the context of this
18 specification, it's not an algorithm.

19 Q Well, it's not an algorithm for an
20 entire claim element. I'm not asking you to
21 review the claims in this, but it is an algorithm
22 for that specific function, right?

23 MS. WEISKOPF: Object to form.

24 THE WITNESS: I mean, in in the real
25 world, it would almost always be a step in an

1 algorithm, not an algorithm in and of itself.

2 But if you defined your entire world as being

3 that one step, then then maybe it could.

4 MR. LESKO: Maybe or yes it could?

5 MS. WEISKOPF: Object to form.

6 THE WITNESS: You would have to consider

7 it in terms of what you're trying to accomplish.

8 Again, if all you're trying to accomplish is

9 exactly what those words say and nothing more

10 than I suppose it could be an algorithm.

11 MR. LESKO: Would your answer be the

12 same if we were talking about 2005 instead of

13 2009?

14 MS. WEISKOPF: Object to form, vague.

15 THE WITNESS: Yes. With all the

16 limitations that I provided before.

17 MR. LESKO: Okay. So I'm marking

18 another document as Plaintiff's Exhibit 13. You

19 have Plaintiff's Exhibit 13. Do you have

20 Plaintiff's Exhibit 13 now in your folder, Dr.

21 Wolfe?

22 (Whereupon, the above-referred to

23 document was marked as Plaintiff's Exhibit No. 13

24 for identification.)

25 THE WITNESS: I see it, let me download

1 it. Okay.

2 BY MR. LESKO:

3 Q Do you recognize this document?

4 A Well not really, but it appears to be a
5 declaration that I prepared about five years ago.
6 I definitely recognize some of the content.

7 Q Okay, I think that's right. If you'd
8 like to maybe scroll down to Page 117, the last
9 page. Do you see your signature on that page.

10 A Yes.

11 Q Does it look like a declaration you
12 submitted and signed on December 5th, 2019.

13 A Yes.

14 Q Okay. There is a section, starting on
15 PDF Page 18. Well, before I even ask you this,
16 I'm sorry. Withdraw the question. But you can
17 turn to Page 18. I'm looking at your CV, and it
18 seems like you clearly have a deep understanding
19 of touch sensitive display technology. Do you
20 agree with that?

21 A Yes.

22 Q Okay. So touchscreens, touch sensitive
23 displays, touch sensing on a display. So it
24 seems to me reading your CV, that's an area where
25 you have significant experience and expertise

1 based on what was presented.

2 A I think that's accurate.

3 Q And so, if you look at this Page 18, you
4 go through starting in Paragraph 36, there are --
5 actually probably all the way through - it goes
6 on for a while. All the way through Paragraph
7 53, you have a background of touch sensing
8 technology, right?

9 A Yes. That may have been more than the
10 Patent Office needed to know.

11 Q I suspect, though, you believe what's in
12 here, I'm sure you believe all this is true and
13 accurate, right?

14 A I do.

15 Q Okay. And it's based on your
16 significant experience in that field, is that
17 right?

18 A Yes.

19 Q Okay. So you reference here, PDF Page
20 18. At the beginning of this section, you refer
21 to measurement and decision algorithms. Take a
22 minute to look at that. There's a sentence
23 there. It starts, in addition, innovations have
24 been introduced in sensing circuitry measurement
25 and decision algorithms and detection of motions

1 and gestures. If you read that sentence and kind
2 of read the surrounding context, can you tell me
3 what you're talking about in that section -- in
4 that sentence, I should say, is more accurate?

5 A So in general, an algorithm is a
6 detailed description of a process where you
7 describe the steps to be taken, the sequence of
8 steps, the conditions under which certain steps
9 should be performed, and the data that should be
10 evaluated in performing those steps and the
11 results that should be provided. And over the
12 years, people have developed a number of
13 algorithms for measurement of touch data, for
14 processing of that data to improve its quality
15 and for making decisions based on that data. So,
16 for example, whether you've tapped on the screen
17 or whether or not you're trying to draw a
18 straight line, and both in the patent art and in
19 the non-patent literature, people have described
20 many of those algorithms in substantial detail.

21 Q So as of October of 2005, those type of
22 touch algorithms, they were around, is that
23 right?

24 A Some were, there have been some very
25 substantial improvements since then. I think

1 Apple in particular would contend that they made
2 great improvements in some of those algorithms
3 with the introduction of the iPad and the iPhone.

4 Q But certainly in 2005, algorithms
5 existed to figure out where a user is touching a
6 touch screen. Would you agree with that?

7 A Those algorithms did exist. There were
8 many different kinds. Some were suitable for
9 some things, others were suitable for other
10 things.

11 Q Like an algorithm for saying, for
12 example, there's an option displayed on a touch
13 screen, and I want to know if a user touched that
14 option or didn't touch it. Did an algorithm
15 exist in prior art for that specific task?

16 A I don't know that there was one for that
17 specific task. I mean, there was there was
18 enough description of algorithms that a person of
19 ordinary skill could have created an algorithm to
20 select a specific item, but it would depend on
21 what the item is, what its shape is, what its
22 size is, how long you wanted the person to touch
23 it before you recognize their touch. So you'd
24 need to consider a number of factors in order to
25 choose the appropriate algorithm or construct the

1 appropriate algorithm.

2 Q So I can select a menu option on a
3 screen. I realize you could construct an
4 algorithm, but let's say if I wanted to select
5 from an existing algorithm, per se, I've
6 displayed a button on my screen, did the user
7 select it or not select it? Was that existing
8 algorithm there and available as of 2005?

9 A There were a number of existing
10 algorithms. Depending on the specifics, you
11 would have to choose one. Is that button square?
12 Is that button oval? Is that button round? Is
13 it large? Is it small? Will somebody die if you
14 pick the wrong button? So, if somebody just
15 pokes at something, do you want to recognize
16 that? So there were a number of algorithms and
17 depending on the requirements of the specific
18 situation, a person of ordinary skill could
19 choose one.

20 Q Yeah, what if the requirement was very
21 basic, like was there a touch or not a touch.
22 Was that algorithm out there and available. So I
23 don't -- it doesn't really matter to me how long
24 just impressed the shape of it really doesn't
25 seem that relevant. Let's say doesn't matter.

1 But I wanted to say did you touch the option or
2 not touch it? Was that an algorithm that existed
3 in the prior art?

4 MS. WEISKOPF: Object to form.

5 THE WITNESS: I don't think so. Not
6 without regard to the shape, because otherwise I
7 don't know how you would determine whether you
8 touch something or you touched outside of it. I
9 guess there was an existing algorithm of did you
10 touch the screen at all? But if you wanted to
11 select a particular object, then I think you need
12 some information about the nature of that object
13 to select an algorithm.

14 MR. LESKO: But there's multiple
15 algorithms available for different objects on a
16 screen at that time in 2005. So there was an
17 algorithm probably for did you touch a circular
18 object? There's probably an algorithm for did you
19 touch a word? There's probably an algorithm for
20 did you touch a square. Would you agree with
21 that?

22 MS. WEISKOPF: Object to form.

23 THE WITNESS: I think those all probably
24 existed. But again, the challenge would be
25 choosing the right one.

1 MR. LESKO: So I'm putting in the folder
2 Plaintiff's Exhibit 14. Are you able to access
3 this item?

4 (Whereupon, the above-referred to
5 document was marked as Plaintiff's Exhibit No. 14
6 for identification.)

7 THE WITNESS: Hasn't refreshed yet?
8 Give me a second.

9 BY MR. LESKO:

10 Q Sure.

11 A I think we got it. Okay. I have it.

12 Q Okay, do you recognize that document?

13 A Yes.

14 Q What is it?

15 A This is a patent application that I
16 filed in 2009 that has been issued as a patent.

17 Q Okay, and so what we're looking at,
18 though, just to clarify, in Plaintiff's Exhibit
19 14 is the issued patent, do you agree?

20 A It is.

21 Q So let's just scroll down to Column 1,
22 really underneath the heading background, the
23 very first sentence. Can you read that sentence
24 out loud?

25 A Touch screens are widely used for

1 inputting data in a variety of electronic
2 devices, including handheld devices such as
3 mobile phones and cameras.

4 Q Do you agree with that statement as of
5 the filing date for this patent application that
6 led to this patent?

7 A Yes.

8 Q Okay. So let's go back to October in
9 2005. Would that statement also be true?

10 A Probably not.

11 Q What would be different in 2005?

12 A I don't think it was widely used in
13 either mobile phones or cameras in 2005.

14 Q So have you kind of amended this to say
15 touch screens are used for inputting data in a
16 variety of electronic devices, including handheld
17 devices such as mobile phones and cameras. You
18 amended it to say that in 2005. Would that be
19 accurate?

20 A I think it would.

21 Q You said it would?

22 A Yes.

23 Q Okay. I'm sorry, you cut out for a
24 minute there. Sorry, I lost my place here. Oh,
25 okay. There's another statement here in this

1 Column 1 of Plaintiff's Exhibit 14. It's the
2 last sentence in this background section. It
3 starts with the word rather. Can you read that
4 sentence out loud?

5 A Rather by touching the touch screen, a
6 change is sensed in the touch screen panel and a
7 touch screen controller couples the sensor to a
8 driver and/or computer processing unit, CPU, and
9 translates information from the touch sensor into
10 data usable by the driver CPU.

11 Q What does that mean?

12 A That means that in prior art touch
13 screens, there would be a touch screen controller
14 which would measure signals from a touch screen
15 sensor and generally inform a CPU about those
16 signals by translating the measurements into a
17 more usable form that the CPU could interpret.
18 Typically where and when the touch had occurred.

19 Q What format was it translated to for the
20 CPU?

21 A It would vary. Typically some
22 descriptive message. That would say something
23 like there's been a new touch at this X
24 coordinate and this Y coordinate.

25 Q Now, that statement we were just

1 discussing those starts with the word rather and
2 ends with the word CPU in Plaintiff's Exhibit 14,
3 was that statement true in October 2005?

4 A I believe so.

5 Q I think you refer here to the prior art,
6 right? I realize we're talking 2009. So prior
7 art in 2005. This statement that starts with
8 rather, ends with CPU in Plaintiff's Exhibit 14
9 still applies to that prior art. Is that right?

10 A In general, yes.

11 MS. WEISKOPF: Objection.

12 MR. LESKO: Would the prior art touch
13 screens have algorithms for handling that
14 translation that's discussed here and also
15 referred here in Plaintiff's Exhibit 14?

16 THE WITNESS: They would. Those
17 algorithms would differ from system to system and
18 sensor to sensor. But they would use algorithms.

19 And in fact, in this patent Figure 6B describes
20 an algorithm for this particular touch screen.

21 BY MR. LESKO:

22 Q Okay. Where did you say there's an
23 algorithm for this particular touch screen?

24 A Figure 6B.

25 Q Figure 6B.

1 A Yeah.

2 Q So that's an algorithm for translating
3 touches to the CPU in this particular system in
4 6b?

5 A No, this is an algorithm for sensing.

6 Q Okay.

7 A And it's only a portion of the
8 description of the algorithm.

9 Q So 6b is part of an algorithm for touch
10 sensing used in the system described in this
11 Plaintiff's Exhibit 14?

12 A It's a portion of the description of an
13 algorithm for sensing.

14 Q Okay. So this patent gets into some
15 maybe new algorithms for sensing. But based on
16 the background here, what we just discussed,
17 existing algorithms for sensing did exist. Do
18 you agree?

19 A For different kinds of touch screens
20 than this one, they did.

21 Q And then algorithms existed for quote
22 translating information from a touch sensor into
23 data usable by the driver/CPU. Do you agree?

24 A A variety of algorithms did exist,
25 depending on the particular structure and

1 configuration of the touch screen.

2 Q And that was the case in 2005, those
3 algorithms are available?

4 A For touch screens that existed in 2005,
5 they included algorithms that would format the
6 data and present it to a host computer or a main
7 CPU.

8 MR. LESKO: Would you like to take a
9 lunch break now or would you like to keep going,
10 Dr. Wolfe? I'm just trying to be polite.

11 THE WITNESS: No, we can take a lunch
12 break now.

13 MR. LESKO: Okay. That works for me.

14 MS. WEISKOPF: How long?

15 MR. LESKO: Let's go off the record if
16 you could, Eric.

17 COURT REPORTER: Yes, we're off the
18 record at 12:29 p.m.

19 (Whereupon, the above-entitled matter
20 went off the record at 12:29 p.m. and resumed at
21 1:19 p.m.)

22 COURT REPORTER: We're back on the
23 record at 1:19 p.m.

24 MR. LESKO: Okay, Dr. Wolfe, I've
25 uploaded the exhibits folder Plaintiff's Exhibit

1 15. Could you open that, please? Oh, I'm sorry.

2 Before we get to that, during the break, did you
3 talk to Counsel at all? Ms. Weiskopf?

4 THE WITNESS: No.

5 MR. LESKO: You did not talk?

6 THE WITNESS: I did not talk to Ms.
7 Weiskopf during the break.

8 MR. LESKO: Okay, not on the chat or
9 anything either. Just not at all?

10 THE WITNESS: I did not communicate with
11 her in any way outside of what you see on the
12 record.

13 BY MR. LESKO:

14 Q Okay. Thanks. So back to Plaintiff's
15 Exhibit 15, please. Is that open on your screen?

16 (Whereupon, the above-referred to
17 document was marked as Plaintiff's Exhibit No. 15
18 for identification.)

19 A Not yet. But it's coming.

20 Q Have you ever seen this document before?

21 A No.

22 Q Did you say yes or no?

23 A No.

24 Q Oh, okay. Okay so, if you could just
25 read the first two sentences there. It says, an

1 if statement is a fundamental control structure.

2 Can you start there, please?

3 A Sure. An if statement is a fundamental
4 control structure in programming languages that
5 allows you to execute specific code blocks based
6 on whether a condition is true or false. It is
7 used to make decisions and control the flow of
8 execution in your program.

9 Q Thank you. Do you agree with that
10 statement?

11 MS. WEISKOPF: Object to form, vague.

12 THE WITNESS: The statement is vague.
13 It would be true for some programming languages.
14 But not for others.

15 MR. LESKO: So what's an example of a
16 programming language where an if statement means
17 something different? From what's --

18 THE WITNESS: Programming languages that
19 don't have if statements.

20 BY MR. LESKO:

21 Q Okay. So there's a programming language
22 that doesn't have an if statement specifically.
23 What's an example of that?

24 A Certainly true in assembly language. I
25 believe it's true in Lisp, but it's been a couple

1 decades since I programmed in Lisp. Again, I
2 don't know every programming language, but it's
3 not a requirement for programming languages.
4 There are different programming languages that
5 work in different ways.

6 Q Would they usually have an equivalent to
7 determining whether a condition is true or false?
8 Do most programming languages have that type of
9 ability?

10 A Some do and some don't.

11 Q All right. So just scroll down if you
12 could to Page 2. There's a statement that says,
13 an if statement consists of two main parts and
14 then there's two bullet points. Can you just
15 read that sentence and those two bullet points
16 for me, please?

17 A An if statement consists of two main
18 parts. The condition, this is an expression that
19 evaluates to either true or false, and a code
20 block. This is the code that will be executed if
21 the condition is true.

22 Q Was that statement consistent with your
23 understanding of an if statement in programming?

24 MS. WEISKOPF: Objection, vague.

25 THE WITNESS: Consistent with the way

1 some programming languages are implemented, but
2 not all.

3 MR. LESKO: So did an if statement
4 consisting of these two main parts exist in 2005?

5 THE WITNESS: It existed, again, as
6 described as a building block. It's not an
7 algorithm.

8 BY MR. LESKO:

9 Q So an if statement consisting of
10 condition and code block existed as a building
11 block for code in 2005?

12 A It did.

13 Q A skilled artisan in 2005, like the
14 skilled artisan defined in your declaration,
15 Plaintiff's Exhibit 1, will be familiar with that
16 if statement in that format?

17 A They would and they would also know what
18 additional information they needed in order to
19 use it effectively.

20 Q Okay. So you can close the document if
21 you'd like. Have you ever heard of data roaming?

22 A Depending what context.

23 Q Yeah. In the context of cellular
24 networks and cellular phones. Have you heard of
25 the concept of roaming?

1 A Yes.

2 Q Are you familiar with -- can you
3 describe what that concept is. What is roaming?

4 A It's used in a number of different ways.

5 The term does not appear in the patents. It was
6 used commercially by a number of vendors, in a
7 variety of ways, to represent obtaining service
8 that was not from their own supported cell
9 towers. And it might include simply using towers
10 of other vendors that have a cooperation
11 agreement without any financial impact. It could
12 include using vendor towers -- from other vendors
13 where there is some differential in pricing. Or
14 it could sometimes involve using a secondary
15 communication system that might be incompatible,
16 as if you were in another country and there was a
17 secondary form of communication supported. It's
18 somewhat time dependent, because in practice the
19 most common usages have changed over time.

20 Q All right. So let's talk about usage in
21 2005. The usage of the term roaming when
22 discussing cell phones and cellular networks.
23 What did that mean in 2005?

24 A I think in general --

25 MS. WEISKOPF: I'm going to object.

1 This is very far outside the scope of Dr. Wolfe's
2 declaration.

3 THE WITNESS: Right, so as I mentioned,
4 it's not a term that's found in the patents or
5 the claims, but in general it meant using --
6 connecting to a tower that was not operated by
7 your primary service provider. Whether or not
8 that was transparent to you or whether it had
9 some impact on your usage patterns either way.

10 MR. LESKO: I'm reading -- I know you
11 haven't seen this. I'm reading something from T-
12 Mobile's invalidity conventions, it says, quote
13 long before the priority date of the asserted
14 patents, it was well-known that users were
15 allowed to select their home network or could
16 switch roaming off to prevent data upload or
17 download if there are roaming charges, end quote.

18 Do you agree with that statement?

19 MS. WEISKOPF: I'm going to object. He
20 hasn't reviewed the contentions, he hasn't seen
21 the document. And this is very far outside of
22 his testimony that he's offering.

23 THE WITNESS: So again, I haven't seen
24 that statement in context, that could change my
25 opinion. But in the 90s, I think, you know,

1 prior to unlimited plans and such, I do recall
2 there being options to turn off roaming, in some
3 systems.

4 MR. LESKO: So before the priority date,
5 it was well known that users were allowed to
6 select their home network or can switch roaming
7 off to prevent data upload or download if there
8 are roaming charges. Would you agree with that?

9 MS. WEISKOPF: Same objection as before.
10 It's very far outside the scope, and he hasn't
11 seen what you're reading from or what is cited or
12 anything.

13 MR. LESKO: Okay. You don't need to
14 have speaking objections, Ms. Weiskopf. Your
15 objection is noted.

16 MS. WEISKOPF: Well, I think maybe what
17 we can do is for this entire line of questioning
18 about roaming and you reading from the invalidity
19 contentions, I'll just keep the same objection
20 and I'll just say same objection. Is that okay
21 with you?

22 MR. LESKO: Sure. Objection, scope? Is
23 that your objection?

24 MS. WEISKOPF: And also that it's out of
25 context. So, it's sort of mischaracterizing the

1 statement.

2 MR. LESKO: I don't think that's a
3 proper objection. What's your objection that you
4 want to maintain?

5 MS. WEISKOPF: Vague. That it's vague
6 and that it's outside of the scope of any opinion
7 that he's offering.

8 MR. LESKO: So objection, vague,
9 objection, scope? That's what you want to
10 maintain?

11 MS. WEISKOPF: For sure. And then I'll
12 add more if I --

13 MR. LESKO: Okay.

14 THE WITNESS: So if I take that
15 statement out of context, then I do believe it
16 was true.

17 MR. LESKO: Okay. And there's a lot of
18 discussion in between, I just want to -- I know
19 you've kind of answered this, so I just want to
20 say -- so it was well known. Regardless of the
21 context here, I'm just asking you, was it well
22 known that users were allowed to select their
23 home network, or can switch roaming off to
24 prevent data upload or download if there are
25 roaming charges before the 2005 priority date?

1 THE WITNESS: Again, taking that
2 statement out of context, it sounds like it's
3 true to me in 2005.

4 BY MR. LESKO:

5 Q So if roaming -- if the phones -- if
6 that was a -- let me withdraw my question. In
7 order for a user to be able to turn roaming on or
8 off, does the cell phone need to determine if
9 it's roaming?

10 A No.

11 Q And here's another way to phrase it.
12 Cell phones in 2005, could they determine and
13 report to a user that they were roaming or not
14 roaming?

15 MS. WEISKOPF: Object to form,
16 foundation.

17 THE WITNESS: Some could, some couldn't.
18 It would depend on the phone. It would depend
19 on the provisioning by the provider. It would
20 depend on the way the network had been set up.
21 There are lots of conditions that you would have
22 to evaluate.

23 MR. LESKO: So you were familiar with
24 cellular phone technology in 2005?

25 THE WITNESS: Yes.

1 MR. LESKO: Okay. And would you agree
2 that cellular phones existed that had the
3 capability to determine if they were roaming or
4 not roaming?

5 MS. WEISKOPF: Object to form.

6 THE WITNESS: There were cell phones
7 that existed as the capability of indicating
8 whether they were roaming or not roaming.
9 Without doing a much deeper investigation, I
10 couldn't tell you whether or not they were making
11 that determination, or whether or not they were
12 communicating back with a carrier who was making
13 that determination elsewhere.

14 MR. LESKO: So did programming exist in
15 2005 to make that type of determination, i.e.
16 roaming or not roaming?

17 THE WITNESS: It existed somewhere. But
18 as I said, I can't tell you for sure without
19 doing some more analysis whether it existed on
20 the phone platform.

21 MR. LESKO: So if it didn't exist -- so
22 if it existed on the phone platform, then you're
23 saying there might be software on the phone that
24 determines if it's roaming or not. Is that what
25 you mean by that?

1 MS. WEISKOPF: Objection, vague.

2 THE WITNESS: Again, I can't confirm
3 that that was ever implemented. But
4 hypothetically, it's possible that somebody could
5 do that. They would need an algorithm to be
6 defined and a set of criteria.

7 MR. LESKO: And so in, what's the other
8 way? Would there be an algorithm on a, would
9 there be a signal from the cell tower that tells
10 you it's a roaming or not? Is that a possibility?

11 MS. WEISKOPF: Objection, speculation.

12 THE WITNESS: I don't know if there
13 would be a way to do that directly. Again, it
14 might be possible. You would need to define the
15 criteria. It's also quite possible that you
16 simply get a cell phone tower ID and that you
17 send that back to your carrier, and your carrier
18 determines whether it's their tower or not their
19 tower.

20 MR. LESKO: So the tower ID, where does
21 that come from that you're referring to in your
22 last answer?

23 THE WITNESS: Again, if it exists, it
24 may exist in some systems. It may not exist in
25 other systems. But it wouldn't be communicated

1 from the tower to the phone.

2 BY MR. LESKO:

3 Q Well, just set aside roaming. And you
4 said you know about cellular phone technology and
5 cellular network technology in 2005. Is that
6 right?

7 A Yes.

8 Q Okay. Are you aware -- was there
9 technology for cellular phone to receive a tower
10 ID from a network to which it was connected in
11 2005?

12 A I can't tell you for certain. I think
13 it probably existed in at least some systems, but
14 maybe not in all systems.

15 Q When you say probably existed, what do
16 you mean by that? Are you aware of it existing at
17 all, or can you confirm there's any situation
18 where it existed that a phone could receive a
19 tower ID from a cellular network?

20 MS. WEISKOPF: Object to form.

21 THE WITNESS: Not as a factual matter.
22 Without going back and reviewing the protocols
23 again, I would expect it to be the case in some
24 protocols and not in others. But I don't know
25 factually, one way or the other for any

1 particular protocol.

2 MR. LESKO: So you reviewed Dr. Hughes's
3 declaration Exhibit 4 in preparing your
4 declaration in this matter, is that right?

5 THE WITNESS: I did.

6 BY MR. LESKO:

7 Q Okay. And do you recall he mentioned
8 data roaming in his declaration?

9 A I do remember that he mentioned it, but
10 I'd have to go look to see where and in what
11 context.

12 Q Okay. But you didn't have any reason to
13 consider his opinion on data roaming in putting
14 together your declaration?

15 A I considered all of his opinions with
16 respect to the controller elements. But once
17 again, data roaming is not in the specification.

18 It's not in the claims. I was asked to look at
19 specific issues and that is whether or not the
20 word controller itself had sufficient structure
21 to implement the claims without looking to the
22 specification. I concluded it did not. And then
23 whether or not the specification provided
24 sufficient support for the claimed functions.
25 None of that information had anything to do with

1 roaming, because roaming is not mentioned in the
2 specification and it's not mentioned in the
3 claims.

4 Q You talk about the structure of the
5 controller, whether it's insufficient structure.
6 What do you mean by that?

7 A So the question is would a person of
8 ordinary skill understand -- one of the questions
9 is would a person of ordinary skill understand in
10 the context of the claim, from the word
11 controller alone, what structure is being
12 claimed? And the answer is no, the way that
13 that's used in that particular claim, there is no
14 specific structure known to a person of ordinary
15 skill for a controller that, on its own, absent a
16 specific algorithm, is capable of performing the
17 claimed functions.

18 Q So when you say structure, are you
19 referring to hardware? Hardware plus programming
20 or programming? What are you referring to
21 specifically? What would provide structure?
22 First let me ask you, could it be just the
23 hardware item itself? Could that provide
24 structure?

25 MS. WEISKOPF: Objection, form.

1 THE WITNESS: In the abstract, yes. But
2 you've really pointed out one of the problems
3 here is that in the context of this claim, the
4 word controller alone doesn't tell you whether or
5 not it's claiming hardware or software or
6 hardware and software together. So you need to
7 look to the specification to understand that, and
8 you need to look at the claimed functions in
9 order to understand what's actually being claimed
10 in terms of structure.

11 MR. LESKO: Could structure for the
12 claim also be provided in the form of a program
13 for the controller? Was that another structure
14 based on your understanding of what we've been
15 instructed on the law?

16 THE WITNESS: Yes. If a program had
17 been disclosed and if that program had been
18 linked to the claimed functions and the term
19 controller in a way that a person of ordinary
20 skill would understand those relationships, then
21 that would be sufficient structure. If you had a
22 program that was disclosed that performed the
23 claim function and was linked to the claim
24 function, I think that that could be the right
25 structure. I did not see that here.

1 BY MR. LESKO:

2 Q One of the claim itself, you sort of
3 described in words, the program for the
4 controller. Is that something you considered
5 whether the claim itself described in words a
6 program or the controller?

7 A I did consider that. I don't believe
8 that the claim language itself describes the
9 structure of the controller or an algorithm for a
10 processor that would be the controller in
11 sufficient detail to perform the claimed
12 functions. It simply recites the functions. And
13 also, I don't think that the functions that are
14 claimed are completely supported in the body of
15 the specification.

16 Q So the program in the claim, though,
17 that you're looking for, it wouldn't have to be,
18 per se, actual software code. Would you agree
19 with that?

20 A No, it would need to be the structure of
21 a program that was more than simply the function
22 of the program.

23 Q Okay. So like I -- like you said, if
24 there was an algorithm in the claim, you know,
25 even if it wasn't an if else statement, let's

1 say, or formal programming language, there could
2 be a structural program in the claim. And you
3 were looking for that when you were reviewing
4 these claims. Is that correct?

5 A I did look for that. I did not see a
6 structural program. I only saw functions
7 described in the claim. And as I mentioned, I
8 did not see support for all of those functions in
9 the body of the specification.

10 Q Well, let's turn to Plaintiff's Exhibit
11 3, Dr. Wolfe.

12 A Okay.

13 Q Thanks. Let's go ahead and scroll down
14 if you could, to PDF Page 32 of Plaintiff's
15 Exhibit 3, which is -- I don't think you would
16 agree those are the claims of the '472 patent.
17 Do you agree with me?

18 A Yes.

19 Q Okay. So on Line 24 through 26 in
20 Column 17 there's language that says, during any
21 period direct -- detected by the controller in
22 which all three of the following conditions are
23 met. Can you see that?

24 A I do.

25 Q What does that mean? During any period

1 detected by the controller in which all three of
2 the following conditions are met?

3 A Needs to be taken into context. It
4 talks about a function of automatically
5 connecting to a picture hosting service that is
6 internet based, and enabling an upload to the
7 picture hosting service over the internet and via
8 the cellular interface of a group of image sensor
9 captured pictures stored in the local memory.
10 And then it says when that function should be
11 performed during any period detected by the
12 controller, in which all three of the following
13 conditions are met, and then in functional terms,
14 it describes three conditions.

15 Q So, reading that language, if conditions
16 one, two, and three in the claim are met, Element
17 f(ii) of claim one of the '472 patent is carried
18 out. Do you agree?

19 MS. WEISKOPF: Object to form, vague.

20 THE WITNESS: I don't see the word if,
21 right? If I saw the word if, to me if it were
22 being written in the form of an algorithm, it
23 would mean if and only if. Where in a claim,
24 it's my understanding that that's not something
25 that I can assume. So I have not put that

1 limitation on that.

2 MR. LESKO: So how would you interpret
3 the language during any period?

4 THE WITNESS: It's a comprising claim.
5 So I would interpret it that -- again I have to
6 interpret it probably in light of the -- of the
7 file history where the applicant kept explaining
8 that it doesn't just mean during any period, but
9 what it says is, I think that the particular
10 automatic connection and uploading that's
11 described in this limitation has to happen during
12 any period of time determined or detected by the
13 controller, which again, we don't really have
14 structure for, in which each of those three
15 conditions are met.

16 And as I mentioned before, at least one
17 of those conditions, maybe two or three, really
18 are not supported in the specification. So it
19 means that you have to determine using data from
20 the cellular interface that you are -- that the
21 system is within a period without potentially
22 increased cellular network access fees. And you
23 also have to determine from -- that you are
24 connected to the internet via the cellular
25 interface. And you also have to have determined

1 that at least one picture captured by the phone
2 sensor, and not from somewhere else, has been
3 designated through the touch sensitive display
4 and not some other way, as being part of the
5 group of pictures to be uploaded to the picture
6 hosting service. So at a minimum, all those
7 conditions have to be true. But it's a
8 comprising claim, so I don't see anything that
9 says that you can't also upload when one of those
10 conditions is false.

11 BY MR. LESKO:

12 Q So you're talking about outside the
13 scope of the claim, there's a possibility the
14 same system performs other uploads? Is that what
15 you're suggesting?

16 A No, I'm saying within the scope of the
17 claim, there's a possibility that it performs
18 other uploads based on my understanding of a
19 comprising claim. As long as you meet all the
20 limitations of the claim, you can do other things
21 as well. And I don't see any place where it says
22 only, or if it says only if or anything like
23 that. It simply says that under those three
24 conditions, you can automatically upload
25 pictures.

1 Q Are you saying you can or you must under
2 those three conditions according to Element
3 f(ii)?

4 A That you are configured to.

5 Q All right. So -- just looking at Claim
6 5, do you see Claim 5?

7 A Yes.

8 Q So it says, during any period detected
9 by the controller in which all the following
10 conditions are met.

11 A Yes.

12 Q So, if all four of these conditions are
13 met, what happens according to the claim?

14 A If all four of the conditions are met,
15 according to the claim, you will automatically
16 connect to a picture hosting service that is
17 internet based and enable and upload to the
18 picture hosting service over the internet and via
19 the cellular interface of a group of image sensor
20 captured pictures stored in the local memory.
21 But again, I don't see that as being -- well,
22 that is a limitation of the claim. I don't see
23 anything that says that that's the only time that
24 you can upload pictures.

25 Q Right, I understand what you're saying

1 there. I understand your argument. But what I'm
2 saying, though, is if those four things happen,
3 then element (ii) is carried out. Would you
4 agree with that?

5 A That's true. I think that's a
6 functional description of a system, not an
7 algorithm.

8 Q If condition 1, condition 2, condition
9 3, and condition 4 are all true, then it will
10 automatically connect to a picture hosting
11 service that is internet based and enable and
12 upload to a picture hosting service over the
13 internet. And via the cellular interface, give a
14 group of image-sensor captured pictures stored in
15 a local memory. Do you agree with that?

16 MS. WEISKOPF: Object to form.

17 THE WITNESS: I don't think so. It
18 doesn't say if, and if you're using if as a code
19 construct, then I would disagree. What it says
20 is that during a period where those conditions
21 are met, it will perform the upload that was
22 previously described.

23 MR. LESKO: What's the difference
24 between during any period and if, in your view?

25 THE WITNESS: Well, again, if you're

1 using if not in plain English language, which
2 would depend on context, but if you're using if
3 in the way we would use it in an algorithmic
4 construct, then it means if and only if, which is
5 not what I see described here.

6 BY MR. LESKO:

7 Q And you're basing that conclusion on the
8 use of the word comprising?

9 A The use of the word comprising and the
10 structure of the claim as a whole. It would have
11 been very easy to say only during, if that's what
12 the patentee intended.

13 Q So in the structure of an if else
14 statement, is it always only if?

15 A In the programming languages that I'm
16 familiar with at the moment, yes. Again, you can
17 build your own programming language, do anything
18 else. I'm sure there are thousands of
19 programming languages out there. But in the way
20 that I would describe an algorithm to a person of
21 ordinary skill, I use if to describe things that
22 only happen under a certain condition, else to
23 describe things that happen when that condition's
24 false. And if you have things that can happen
25 that happen whether or not the condition is true,

1 then you do them outside of the if else
2 statement. But that's why we write pseudocode
3 and build flowcharts is because they're precise
4 as opposed to language, which can be more
5 ambiguous than in written English paragraphs.

6 Q How would that look, those conditions
7 you say that fall outside the if or outside the
8 else, how would they look in the code?

9 MS. WEISKOPF: Object to form, vague.

10 MR. LESKO: So that would be a different
11 structure? What would that look like?

12 THE WITNESS: It would simply perhaps be
13 -- again, it depends. You have to actually have
14 the algorithm to know what it would look like.
15 But, hypothetically, it could happen before an if
16 statement or instead of an if statement, or after
17 an if then else statement had completed.

18 BY MR. LESKO:

19 Q I'm going to go to the '472 patent,
20 Column 1, Lines 55 to 60. Can you scroll to
21 those pages, Dr. Wolfe? Let me know when you're
22 there.

23 A I'm at Column 1, Line 55.

24 Q All right. So this says U.S. Patent
25 numbers 4,951,079, 6,021,278 and 6,101,338 are

1 herein incorporated by reference. You see that?

2 A Yes.

3 Q Do you know what that means,
4 incorporated by reference?

5 A I do. My understanding is depends a
6 little bit on the language that, that is used.

7 Q So during your review of the file
8 history, though, did you see the statement in the
9 '472 patent?

10 A I did.

11 Q Did you say yes?

12 A Yes.

13 Q Okay. And during your review of the
14 '761 patent, did you see an equivalent statement
15 in that patent?

16 A My recollection is I did, but let me
17 check. Yes, I did.

18 Q Okay. So do you understand that if a
19 patent incorporates another document by reference
20 and incorporated materials treated as if it were
21 explicitly included in the patent itself?

22 MS. WEISKOPF: Object to form.

23 THE WITNESS: I do, but it's also my
24 understanding that when it's incorporated in a
25 form like this, where it's incorporated with

1 respect to a particular issue, that it's being
2 incorporated with respect to its teachings about
3 that issue.

4 MR. LESKO: Can you pull up the
5 declaration of Dr. Hughes, I think it's Exhibit
6 4, please?

7 THE WITNESS: Okay.

8 BY MR. LESKO:

9 Q Okay. This is Paragraph 30 of our Dr.
10 Hughes declaration. Do you share that same
11 understanding of incorporation by reference?

12 A That's my general understanding.
13 Although, as I said, it is my understanding that
14 under current law that if a patent is
15 incorporated by reference with respect to a
16 specific feature of the claims, then it only
17 needs to be reviewed -- or it only needs to be
18 incorporated with respect to that feature. And
19 that's my interpretation of the language in these
20 two patents.

21 Q If you look at paragraph -- could you
22 scroll down to paragraph 41 of Dr. Hughes's
23 declaration?

24 A Okay.

25 Q This one refers to the '278 and '338

1 patents to Bernardi.

2 A Okay.

3 Q Did you -- in forming your opinions, did
4 you read either of those patents or look at them?

5 A I didn't because there's been no
6 suggestion that the sensory RSC-164 chip has been
7 linked to the claimed functions, or that there
8 has been an algorithm presented in those patents
9 for the claimed functions.

10 Q So just looking at -- just read
11 paragraphs 41 and 42 of the declaration here to
12 yourself, that's exhibit -- Plaintiff's Exhibit
13 4.

14 A Yes.

15 Q Do you agree or disagree with the
16 statements in paragraphs 41 and 42 here?

17 A I agree with those statements as
18 presented for the purpose of doing voice
19 recognition in the '278 and '338 patents. The
20 RCS 164 microcontroller is disclosed.

21 Q In paragraph 44, it says, it's my
22 opinion, it starts there, it says, it's my
23 opinion, though, that a POSITA would have been
24 the aware of the materials such as those that the
25 inventor specifically incorporated by reference

1 or as patent specification, including the RSC-164
2 family of controllers. Reading this Paragraph 44
3 of the Hughes declaration, do you agree or
4 disagree with this paragraph?

5 A As I understand it, I agree with it
6 because what it does not say, well, no, no. It's
7 ambiguous. If they're talking about a claimed
8 controller in Exhibits 2 and 3, then I disagree.

9 A person of ordinary skill would have known of
10 the RSC-164 family of controllers. They would
11 not know of its suitability for the functions
12 claimed in Exhibits 2 and 3, and they would not
13 have known the structure of the algorithms that
14 are attempting to be claimed in Exhibits 2 and 3.

15 Q Looking at Paragraph 45 of Dr. Hughes's
16 declaration. It refers to three dictionary
17 definitions for controller.

18 A Yes.

19 Q Do you believe that those dictionary
20 definitions reflect the understanding of a
21 skilled artisan as of 2005 for what a controller
22 means?

23 A Well, one of those is from 1996. It's a
24 little early. But the question is a controller
25 in what context? I think that those reflect what

1 a controller would be in a certain context. I
2 don't think they reflect what the controller is
3 being claimed. And also, if you read these
4 definitions, none of them recite specific
5 structure. They all talk about general
6 categories of structure, and they talk about
7 either things that have particular functions,
8 which means they're functional descriptions, or
9 they talk about things where the functionality
10 depends on their programming.

11 And my understanding is that when you
12 claim a function of a controller or a processor
13 in a claim, if that function is specialized, then
14 you need to disclose the algorithm for that
15 specialized function. And none of these
16 definitions change that or disclose -- none of
17 these disclose an algorithm. None of these
18 disclose a specific structure rather than just
19 using other general words to describe it. I
20 mean, look at -- one of these is a circuit
21 mechanism device or system which monitors one or
22 more variables. That's not specific structure.

23 Q So you don't think a circuit is a
24 structural term?

25 A It's not a description of a specific

1 structure. If you sent me off to go get you a
2 circuit, it's very unlikely that I would bring
3 you back what you wanted because you haven't told
4 me with enough specificity, what you expect.

5 Q So what if it is -- so it's usually
6 contained on a single chip, circuit board or
7 device. Do you know what I mean when I say it's
8 contained on a chip? Is the chip a structure?

9 MS. WEISKOPF: Object to form.

10 THE WITNESS: Chip is a structure. But
11 again, that's not saying what it is. It's saying
12 what form it takes. It's like saying it comes in
13 a box. It doesn't tell you the structure of the
14 underlying thing. And again, if you look at the
15 total description there, it uses the word device.
16 Device is a nonce term.

17 BY MR. LESKO:

18 Q Let's turn to Paragraph 46. It refers
19 to Judge Albright's prior opinions. So does 47,
20 frankly. Did you read any of these prior
21 opinions that are listed in Paragraphs 46 and 47?

22 A I did not.

23 Q So do you have any opinion on whether
24 Dr. Hughes's statements in 46 and 47 are
25 accurate?

1 A I don't know if they are or not. I
2 haven't seen Judge Albright's reasoning. I
3 haven't seen whether or not he was provided with
4 all the facts when he made his judgment.

5 Q Would you think there'd be any reason to
6 investigate those opinions in Paragraphs 46 and
7 47?

8 A No, the fact pattern for each one of
9 them is different. They all are in different
10 claims, different patents, different
11 specifications. And I wasn't asked to make a
12 legal judgment. I was asked to determine whether
13 or not a person of ordinary skill would
14 understand sufficient structure for the term
15 controller as it's used in a specific claims in
16 this matter, and whether or not there was
17 sufficient structural or functional support in
18 the specification.

19 MR. LESKO: So I think that's all my
20 questions for today, Dr. Wolfe. I appreciate
21 your time. So thanks for taking the time to
22 speak with me today. Thank you.

23 MS. WEISKOPF: I'm going to have a
24 little bit of redirect. Can I have a one or two
25 minute break, five minute break before we do it?

1 MR. LESKO: Thirty seconds I'll give
2 you. I'm just kidding. Five minutes is fine.
3 Is that how long you want?

4 MS. WEISKOPF: Yeah, maybe just --

5 MR. LESKO: Five or ten. Either fine
6 for me.

7 MS. WEISKOPF: Yeah. Let me just have
8 five, please.

9 MR. LESKO: Okay.

10 MS. WEISKOPF: Thank you.

11 MR. LESKO: So we'll see at 4:20 p.m.
12 my time.

13 MS. WEISKOPF: Sounds good. Thank you,
14 Justin.

15 MR. LESKO: Sure.

16 COURT REPORTER: All right. So we're
17 off the record at 2:13 p.m.

18 (Whereupon, the above-entitled matter
19 went off the record at 2:13 p.m. and resumed at
20 2:20 p.m.)

21 COURT REPORTER: We're back on the
22 record at 2:20 p.m.

23 CROSS EXAMINATION

24 MS. WEISKOPF: Okay. Dr. Wolfe, do you
25 recall discussing the functions in the asserted

1 claims with Mr. Lesko?

2 THE WITNESS: Yes.

3 BY MS. WEISKOPF:

4 Q Okay. Can we please turn to Plaintiff's
5 Exhibit 2, which is the '761 patent?

6 A Yes.

7 Q Okay can you please look at the portion
8 of the claim labeled one, two and three?

9 A I have that.

10 Q Do you have an opinion about whether
11 there are any functions of the controller in this
12 portion of the claim?

13 A The controller is configured to
14 automatically connect under certain conditions.
15 So automatically connecting under the recited
16 conditions is a function.

17 Q Do you have an opinion whether the
18 controller functions to determine that the upload
19 is allowed based on the selected upload option
20 and uses data from the cellular interface?

21 A That is a controller function, yes.

22 Q Do you have an opinion on whether
23 there's structure in the claim sufficient to
24 perform that function?

25 A I'm not even sure I saw a description of

1 the function in the claims -- whether there's
2 structure in the claims? There's certainly not
3 structure in the claims. The only structure in
4 the claims is controller, and not every
5 controller can do that. An ordinary controller
6 can't do that. It would require either
7 specialized hardware or specialized software,
8 neither of which are disclosed in the claim.

9 Q And do you have an opinion whether
10 there's an algorithm in the specification to
11 support that function?

12 A There is not one.

13 Q Okay. Let's turn to Plaintiff's Exhibit
14 3, which is the '472 patent.

15 A Okay.

16 Q Do you recall discussing what's labeled
17 one, two and three and claim 1 with Mr. Lesko?

18 A Yes.

19 Q Alright, do you see any functions of the
20 controller in this portion of the claim 1 of the
21 '472 patent?

22 MR. LESKO: Objection, scope.

23 THE WITNESS: I'm sorry. Yes.

24 MS. WEISKOPF: Do you have an opinion
25 whether the controller is configured to detect

1 that the upload is allowed because the system is
2 within one of the periods without potentially
3 increased cellular network access fees, as
4 determined using data from the cellular
5 interface?

6 THE WITNESS: Yes, the controller must
7 detect that condition.

8 BY MS. WEISKOPF:

9 Q Is that a function of the controller?

10 A It is a function of the controller.

11 Q Do you have an opinion whether there's
12 structure in the claim sufficient to perform that
13 function?

14 A There is not sufficient structure in the
15 claims to perform that function.

16 Q And do you have an opinion whether there
17 is structure in the specification sufficient to
18 perform that function?

19 MR. LESKO: Objection, outside scope.

20 THE WITNESS: I don't believe there is.
21 There is a description of a cellular interface
22 that's been added that I don't think was
23 supported in the original specification, but
24 that's not sufficient to describe this function.
25 This function is more complicated than just

1 requiring the existence of a cellular interface.

2 It would require an algorithm or specialized
3 hardware structure.

4 MS. WEISKOPF: Okay, let's turn to claim
5 5 and look at the portion of the claim in F2. Do
6 you have any opinions whether there's functions
7 in this portion of the claim?

8 THE WITNESS: Yes. The functions to
9 automatically connect under the four specified
10 conditions, and also that the controller must
11 detect those conditions are present. Those are
12 functions.

13 BY MS. WEISKOPF:

14 Q Okay. Looking at the at the portion of
15 the claim with a label two, the numeral two, do
16 you have an opinion whether the controller is
17 configured to confirm that the camera system is
18 within a period without potentially increased
19 cellular network access fees, as determined using
20 data from the cellular interface?

21 A The claim requires that the controller
22 be configured to perform that function.

23 Q Do you have an opinion whether that's a
24 function?

25 A As described in claim 5 it is a

1 function.

2 Q Okay. Do you have an opinion whether
3 there is structure in the claim sufficient to
4 perform that function?

5 A There is not sufficient structure in the
6 claim.

7 Q And do you have an opinion whether
8 there's sufficient structure and the
9 specification to perform that function?

10 MR. LESKO: Objection, outside scope.

11 THE WITNESS: There is not sufficient
12 structure in the specification to perform that
13 function.

14 MS. WEISKOPF: Those are my questions.
15 I can pass the witness, but I would like to
16 review and sign.

17 MR. LESKO: I don't have any further
18 questions. But one thing I wanted to say, I
19 guess on the record though is given the timing of
20 this, we have a briefing on Thursday. I'm going
21 to have to write our brief using the rough
22 transcript, I think. So I guess I would ask if
23 there's -- normally you would review a final
24 transcript and sign, as you're suggesting. I
25 guess I would ask if there's certain corrections

1 that stand out or that are important or that we
2 need to debate before our brief is submitted, if
3 you could try to raise those with us so that
4 we're just making this as efficient as possible.

5 Does that make sense? So in other
6 words, if you see something in the rough
7 transcript when you get it that we need to
8 discuss and consider correcting as you would,
9 let's try to talk about before the brief is
10 submitted or nearly about to be submitted. Can
11 we do that?

12 MS. WEISKOPF: Yeah. We'll make every
13 effort to accommodate that request. I think I
14 need to talk to the court reporter about when we
15 can get the rough and everything because you're
16 right, the timing is tight. So I think we're
17 also having a similar issue, but I will try to
18 accommodate that.

19 MR. LESKO: Okay. And the rough, just
20 so you know, we can go off the record if you
21 want. I don't know if there's anything else to
22 address on the record. I was just going to say,
23 I think they told me an estimate on the rough, I
24 could look it up if you'd like.

25 COURT REPORTER: Yeah. Let's go ahead

1 and finish up and go off the record.

2 MR. LESKO: Oh, it's supposed to be next
3 day rough. So, yeah. Go ahead. Sorry.

4 COURT REPORTER: Okay. And so, Ms.
5 Weiskopf, you are planning to purchase a rough
6 and a final?

7 MS. WEISKOPF: I believe we're going to
8 need to do that given the timing.

9 COURT REPORTER: All right. And then I
10 just have a short little read off. This
11 concludes the deposition of Dr. Andrew Wolfe,
12 taken in the matter of Cutting Edge Vision vs.
13 T-Mobile. Today's date is Friday, March 14th,
14 2025. And the time is now about 2:30 p.m.
15 Pacific. We are off the record.

16 (Whereupon, the above-entitled matter
17 went off the record at 2:30 p.m., signature
18 having NOT been waived.)
